PART A

**Form IPPC Part A – application for a permit, variation, transfer or surrender
For Malta Environment & Planning Authority Use Only**

Data received	Fee received: Yes	No	Amount received	Name assigned to installation
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>	<input type="text"/>

**Application for a permit, variation, transfer or surrender
Integrated Pollution Prevention and Control (IPPC)
Industrial Emissions (IPPC) Regulations 2013**

Introduction to Part A

When to use this form

Use this form if you are sending an application to the MEPA under the Industrial Emissions (IPPC) Regulations, 2013.

The form is to be used for applications made in respect of both 'installations' and 'mobile plant' (and in the rest of the form, the term 'installation' also covers 'mobile plant' where appropriate).

Before you start to fill in this form

There may be two or more operators in a single installation. Each operator will need a permit, each obtained by a separate application. Your applications will principally relate to the part of the installation under your control, but will also need to include some information on the rest of the installation. This will help us to assess the operation of the whole installation. The term "installation", when used in this application form (and elsewhere) may refer to either the whole or part of the installation, depending on the nature of the information we are seeking to obtain.

Which parts of the form to fill in

The form is in five parts but we usually only send you the parts you need to fill in. Everyone has to fill in Part A, and prepare and sign a covering letter at the end of their application.

The other parts you need to fill in depends on the type of application you are making:

- To apply for a new permit – fill in Parts A and B;
- To vary an existing permit – fill in Parts A and C;
- To transfer all or part of an existing permit to

someone else – fill in Parts A and D. This should be a joint application by the transferor and the transferee;

- To surrender all or part of an existing permit – fill in Parts A and E.

Other documents we need to see

There are a number of other documents you will need to send us with your application. Each time a request for documents is made in the application form you will need to record a document reference number for the document or documents that you are submitting in the box provided on the form for this purpose.

Please also mark the document(s) clearly with this reference number and either the application reference number if you know it or your existing permit number. If you do not have either of these, please use the name of the installation.

If you know your Application Reference Number, please enter it into the box below:

Using continuation sheets

In the case of questions required to be answered on the application form itself, please use a continuation sheet if you need extra space; but please indicate clearly on the form that you have done so by stating a document reference number for that continuation sheet. Please also mark the continuation sheet itself clearly with the information referred to above.

Copies

Please submit 1 hard copy and 1 soft copy of the application form and all supporting information.

A soft copy of the application form must also be submitted to the consultees identified in Regulation 19(2) of Legal Notice 10 of 2013. A signed delivery note must be enclosed with the application to MEPA.

If you need help and advice

We have made the application form as straightforward as possible, but please get in touch with us on tel: 2290 7229 or 2290 7231 or email: ippc@mepa.org.mt if you need any advice on how to set out the information we need.

A1 About your application

A1.1 What type of application are you making?

- new permit
- variation of an existing permit
- transfer of an existing permit
- surrender of an existing permit

A1.2 Name of the installation

DDE Attard Ltd

Please tell us if this name is:

- already agreed with the MEPA; or
- one that you are proposing.

A1.3 Please give the address of the site of the installation, and a map or plan showing the site of the installation and the location of the installation on the site

Street Address	3, Scrap Lane	
	Valletta Road	
Locality	Luqa	Post Code LQA 1764

A1.4 Give details of any existing permit(s) for the installation.

Please give details of any applicable waste management licences, planning permits, environmental permits or sewer discharge permits. Include permit number(s), type(s) and date(s) of issue, and submit copies.

Appendix I:

Existing Permits:

- Environmental Permit: WM 0009/06/K
- Planning permits: PA 05538/07, PA 01876/15 (minor amendment included in Volume 3), PA 04172/16

Pending Application:

- Sewer discharge permit application

A2 Authorised contacts

It will help us to have someone who we can contact directly with any questions about your application. The person you name should have the authority to act on your behalf.

A2.1 Who can we contact about your application?

This could be an agent rather than the operator.
Name

Daniel Attard

Position

Director

Address

Street Address	DDE Attard Ltd	
	Scrap Lane	
	Valletta Road	
Locality	Luqa	Post Code LQA 1764

Phone Number 21667857 / 9942 7330

Fax Number 2180 5161

Email address info@ddeattard.com

A2.2 Operational contact

If different to the above, please identify the person we should contact to discuss operational matters on an ongoing basis.

Name

Daniel Attard

Position

Director

Address

Street Address	DDE Attard Ltd	
	Scrap Lane	
	Valletta Road	
Locality	Luqa	Post Code LQA 1764

Phone Number 21667857 / 9942 7330

Fax Number 2180 5161

Email address info@ddeattard.com

A3 About the operator

Please provide the information requested below about the 'operator', which means:

- for applications for a new permit – the person who it is proposed will have control over the installation in accordance with the permit (if granted),
- for applications for a variation, transfer or surrender – the person who currently has control over the installation in accordance with the permit.

If you are applying for a transfer, we will ask for more information relating to the proposed new operator (transferee) in Part D.

Legal status of operator

A3.1 Is the operator an individual, a group of individuals, a partnership or a company/corporate body?

- Individual (sole trader) or group of individuals: go to question A3.2.
- Partnership: go to question A3.3.
- Company or corporate body: go to question A3.5.

Individual applicants

A3.2 Please give us the following details.

Where more than one person is applying (other than as a partnership) we need details of each person.

Continue on separate sheets if necessary.

Full Name	
<input type="text"/>	
ID Card/Passport No.	
<input type="text"/>	
Trading/business name (if any)	
<input type="text"/>	
Business address	
Street Address	<input type="text"/>
	<input type="text"/>
	<input type="text"/>
Locality	Post Code
<input type="text"/>	<input type="text"/>
Phone Number	
<input type="text"/>	

Fax Number
<input type="text"/>

Email address
<input type="text"/>

Now go to question A4, What to do next.

Applications from partnerships

A3.3 Who is applying?

We can only issue permits to named individuals, not to a partnership name. We therefore need details of each person in the partnership.

Continue on separate sheets if necessary.

Person	
Full Name	
<input type="text"/>	
ID Card/Passport No.	
<input type="text"/>	
Principal place of business	
Street Address	<input type="text"/>
	<input type="text"/>
	<input type="text"/>

Contact Numbers

Phone Number

Fax Number

Email address

Now go to question A4, What to do next.

Companies or other corporate applicants

A3.5 Please give us the following details.

Full name of company or corporate body.

DDE Attard Ltd

Trading/business name (if different)

n/a

Registered office address

Street Address	Scrap Lane	
	Valletta Road	
Locality	Luqa	Post Code LQA 1764

Company registration number

C 4938

Date of formation of company

28th March 1980

- For applications from companies, please provide a copy of the certificate of incorporation or registration and any certificates of subsequent name changes.

Document reference number

Appendix 2: Company Registration Certificate

- For applications from other corporate bodies, please provide evidence of status.

Document reference number

n/a

A3.6 Is the operator a subsidiary of a holding company?

No

Yes name of ultimate holding company

--

Registered office address

Street Address		
Locality		Post Code

Principal office address (if different)

Street Address		
Locality		Post Code

Company registration number

--

A4 What to do next

Now you need to fill in the other Parts of this form available online.

If you are applying for

- A new permit – fill in Part B;
- A variation – fill in Part C;
- A transfer – fill in Part D;
- A surrender – fill in Part E.

PART B

Form IPPC Part B: Application for a New Permit

For MEPA use only

Application reference:

Use this part of the form if you are applying for a new permit. Please read carefully Appendix I attached with this application.

B1 About the installation

Please fill in the installation table below with details of all the activities and operators at the whole installation, even if you are applying for a permit in respect of only part of the installation.

In **Column 1: Activities in “the stationary technical unit”**, please describe all activities listed in Schedule 1 of the Industrial Emissions (IPPC) Regulations that are proposed to be carried out. For **Directly associated activities**, please identify any directly associated activities proposed to be carried out on the same site which:

- have a technical connection with the activities in the stationary technical unit; and
 - could have an effect on pollution.
- These could include, for example, boilers, generators, water purification systems, scrubbers and other air purification systems.

In **Column 2: Annex I references**, write the category the installation falls under in Schedule 1 of the Industrial Emissions (IPPC) Regulations (LN 10 of 2013), e.g. 1.1, 5.3(b)(i). In **Column 3: Operator**, write the name of the operator for each activity (if you are the operator yourself, write “Applicant”).

B1.1 The installation and its activities

COLUMN 1

Activities in the “stationary technical unit”

COLUMN 2

Schedule 1 references

COLUMN 3

Operator

Directly associated activities

ELV depollution and dismantling
Baling of tyres and bumpers
Dismantling of WEEE (certain white goods only)
Wire stripping
Wood processing
Storage of various materials associated with the above activities
Temporary storage of sealed containerised solid waste
Composting of food waste (pilot plant)
Maintenance of on-site machinery
Standby generator

DDE Attard Ltd
DDE Attard Ltd
DDE Attard Ltd
DDE Attard Ltd

B1.2 Non-technical summary

Please provide a non-technical summary of the proposed installation activities.

Document reference number:

B1 About the installation *continued*

B1.3 Why is the application being made?

- the installation is new;
- it is an existing installation for which a 'substantial change' is proposed which would necessitate an IPPC permit;
- the installation is existing (in operation before 7 January 2013) and did not require a permit under the IPPC Regulations, LN 234/02 but requires an IPPC permit under the Industrial Emissions (IPPC) Regulations (LN 10/13).

B1.4 Site maps and reports

Please provide:

B.1.4.1

A site report, providing a history of the site (including current and past uses) and describing the condition of the site of that part of the installation in respect of which you are applying for a permit, and, in particular, identifying any substance in, on or under the land which may constitute a pollution risk. A baseline report assessing the state of the groundwater and land may also be required by the Authority.

Document reference number for the report:

Volume 2: Chapter 2

B1.4.2

A suitable map (or maps) showing the location of the site of the installation, and the area of the site covered by the site report and which an IPPC permit is being applied for. The outline of the site should be clearly marked in colour, and the surroundings of the site should be included in the map.

Document reference number for map(s):

Volume 2: Chapter 3

B1.4.3

Suitable block plans, properly labelled, showing the location and nature of the various activities being proposed on that site.

Document reference number for plans:

Volume 2: Chapter 3

All maps and plans submitted shall be to scale, using a scale rule. Soft copies of plans should be submitted in .pdf format only.

B2 Your proposed techniques

B2.1 Environmental Management System

Provide details of your proposed management techniques and environmental management system (EMS). An EMS can take the form of a standardised system (e.g. EN ISO 14001:1996; EMAS) or a non-standardised ("customised") system, provided that is properly designed and implemented.

Document reference number:

Volume 2: Chapter 3

B2.2 Proposed activities

B2.2.1 Describe the proposed installation activities.

Document reference number:

Volume 2: Chapter 3

B2.2.2 Describe the proposed techniques and measures to prevent and reduce waste and emissions of substances and heat (including during periods of start-up or shut-down, momentary stoppage, leak or malfunction).

Document reference number:

Volume 2: Chapter 3

B2.2.3 Submit a flow diagram summarising the proposed installation activities.

Document reference number:

Volume 2: Chapter 3

B2.2.4 Include a comparison of the proposed activities with relevant BAT conclusions published by the European Commission, where these have been published.

Document reference number:

Volume 2: Chapter 3

B2.2.5 Include an outline of the main alternatives considered to the proposed technology, techniques and measures.

Document reference number:

Volume 2: Chapter 3

B2 Your proposed techniques *continued*

B2.3 Raw materials

Identify the raw and auxiliary materials, and any other substances that you propose to use, including fuels. Give details of quantities proposed to be used annually and submit respective MSDS sheets.

Identify the storage location of these materials on a site layout plan and give details on:

- Maximum storage capacity;
- Containment measures (including bunding capacity, where applicable);
- Protective measures (including security).

Document reference number:

Volume 2: Chapter 3

B2.4 Ozone depleting substances and fluorinated greenhouse gases

Provide a list of equipment using ozone depleting substances and fluorinated greenhouse gases, with a fluid charge of 3 kg or more. For each equipment, identify the type of equipment (hermetically-sealed systems, fixed systems or mobile systems), its use (firefighting, refrigeration/air-conditioning or high-voltage switchgear), charge (in kg) and the type of substance (e.g. R22, R407c, R134a).

Document reference number:

Not applicable

B2.5 Maintenance

Provide a proposed maintenance programme for the installation, and a template for keeping records of maintenance.

Document reference number:

Volume 2: Chapter 3

B2.6 Energy

B2.6.1: Provide a breakdown of the proposed annual energy consumption, highlighting the main energy-consuming equipment, and generation by source and end-use (including information on energy generated on site, if applicable).

Document reference number:

Volume 2: Chapter 3

B2.6.2: Describe the proposed basic measures for improvement of energy efficiency.

Document reference number:

Volume 2: Chapter 3

B2.7 Water

Provide a breakdown of the proposed annual water consumption by source and end-use.

Document reference number:

Volume 2: Chapter 3

B2.8 Risk assessment

Describe the documented system proposed to be used to identify, assess and minimise the environmental risks and hazards of accidents and their consequences.

Include:

- (a) emergency plans in case of fire and other emergencies (e.g. explosions);
- (b) plans for actions to be taken in case of failure of abatement equipment;
- (c) plans for actions to be taken in case of other environmentally relevant incidents (e.g. spillages, gas leakage).

Provide certification from a competent company or engineer that the relevant fire safety procedures and equipment are in place.

Certification and fire plans shall include the presence of emergency firefighting water supplies for use by the Civil Protection Department.

Document reference number:

Volume 2: Chapter 3

B2.9 Training

Please submit a proposal for a training programme and a proposed template for keeping training records. Please submit the name of the technically competent person on site who will be responsible for such training.

Document reference number:

Volume 2: Chapter 3

B2 Your proposed techniques *cont.*

B2.10 Cessation

Submit an outline decommissioning plan describing the draft proposed measures upon definitive cessation of activities, to avoid any pollution risk and return the site of the installation to a satisfactory state (including relevant measures for the design and construction of the installation). This plan shall include:

- A qualitative assessment of the potential for contamination of land and groundwater pollution which might arise from the historical and current processes carried out at the installation.
- A draft waste management strategy including:
 - The identification and characterisation of sources, types of wastes (including equipment, tanks, fuels and by-products);
 - Criteria for segregation of wastes;
 - Proposed treatment, conditioning, transport, storage and disposal/recovery methods;
 - Potential reuse/recycling of such wastes.

Document reference number:

Volume 2: Chapter 3

B2.11 Multi-operator installations

Where you are not the only operator of the installation, describe the proposed techniques and measures (including those to be undertaken jointly by yourself and other operators) for ensuring satisfactory operation of the whole installation.

Document reference number:

Not applicable

B3 Your proposed emissions

B3.1 Waste

B3.1.1: Characterise (using the European Waste Catalogue code, in accordance with LN 184 of 2011 as amended) and quantify each waste stream from the installation.

Document reference number:

Volume 2: Chapter 4

B3 Your proposed emissions *cont.*

B3.1.2: Describe the proposed measures for waste management, storage and handling. Indicate the storage location of wastes on a site layout plan and give details on:

- Maximum storage capacity;
- Containment measures (including bunding capacity, where applicable);
- Protective measures (including security).

Document reference number:

Volume 2: Chapter 4

B3.1.3: Describe how each waste stream is, in order of priority and in accordance with Directive 2008/98/EC, prepared for re use, recycled, recovered or disposed of. If you propose any disposal, explain why recovery is technically and economically impossible and describe the measures planned to avoid or reduce any impact on the environment.

Give details on authorised disposal/recovery facilities proposed to be used for each waste. If any on-site recovery of waste is proposed, provide details.

For each waste, give details on off-site transportation, including registered waste carriers/brokers to be used.

Document reference number:

Volume 2: Chapter 4

B3.2 Emissions to Groundwater

Could there be a discharge to groundwater from the installation?

Yes No

If yes, explain how the requirements of the Protection of Groundwater against Pollution and Deterioration Regulations (LN 108 of 2009) have been addressed, and submit a map showing the proposed location of such emissions.

Document reference number:

B3 Your proposed emissions *continued*

B3.3 Emissions to Sewer

B3.3.1: Does the installation have (or is proposing to have) a sewer connection?

Yes No

Please submit a block plan of the site, showing the proposed layout of sewer connections and any other drains (colour-coded), as well as the proposed discharge point(s).

Document reference number:

Volume 2: Chapter 4

B3.3.2: Does the installation have (or is proposing to have) a cesspit?

Yes No

Please provide certification by an independent, warranted engineer showing that the cesspit is in line with the requirements of Schedule 1 Activity 43 of LN 106 of 2007 (as may be amended).

Document reference number:

B3.3.3: Does the installation have a Sewer Discharge Permit?

Yes No

Please submit a copy of the permit, or of the submitted application if the permit has not yet been issued.

Document reference number:

Volume 2: Chapter 4

B3.3.4: Could the installation involve the release of any Schedule A or Schedule B substance into the sewers?

Yes No

If yes, explain how the requirements of LN 139 of 2002 have been addressed.

Document reference number:

B3.4 Emissions to the Sea

Identify if there may be a direct discharge to coastal (up to 1 nautical mile from the coast line) or territorial waters.

Yes No

If any are identified, explain how the requirements of the Discharge of Dangerous Substances Regulations (LN 213 of 2001) and the Water Policy Framework Regulations (LN 194 of 2004 as amended by LN 24 of 2011) have been addressed.

Include details of the source, any treatment proposed prior to discharge, composition and maximum volumes (in m³/day) discharged.

Document reference number:

In addition, please submit a block plan of the site, showing the proposed discharge point to the sea. Indicate the geo-referenced coordinates for discharge to sea.

Document reference number:

B3.5 Rainwater

Describe how rainwater is handled on site. Attach a site drainage map indicating rainwater capture and harvesting/discharge.

Document reference number:

Volume 2: Chapter 4

B3.6 Emissions to Air

Identify if there may be emissions of substances to air.

Yes No

If any are identified, submit details of each emission point, the nature and the proposed quantities of substances emitted from each point and treatment/abatement measures. A block plan of the site showing each emission point should be submitted.

For each boiler/generator, submit the following details: rated thermal input, energy output, date of manufacture, stack height, fuel type and annual fuel consumption.

Document reference number:

Volume 2: Chapter 4

B3 Your proposed emissions *continued*

B3.7 Odour emissions

Identify if there may be emissions of odour.

Yes No

If any are identified, submit details of the main sources of odour, and the proposed techniques and measures for control of odour.

Document reference number:

Volume 2: Chapter 4

B3.8 Emissions to Land

Identify if there may be emissions of substances to land.

Yes No

If any are identified, submit details of the nature and the proposed quantities of substances emitted to land, as well as a map showing the proposed location of such emissions.

Document reference number:

B3.9 Noise

Describe:

B3.9.1: The main sources of noise and vibration (including infrequent sources) of the proposed installation;

B3.9.2: The proposed techniques and measures for control of noise;

B3.9.3: The nearest noise sensitive locations and distance away from the site (a site map shall also be submitted for this purpose); and

B3.9.4: Relevant environmental noise measurement surveys which have been undertaken (monitoring shall be according to the latest revisions of ISO1996 and the rating of industrial noise affecting residential areas shall be according to BS 4142; monitoring shall be carried out exclusively using type 1 sound level meter).

Document reference number:

Volume 2: Chapter 4

B3.10 Monitoring

Describe the proposed measures for monitoring emissions including any environmental monitoring. The following must be specified:

B3.10.1: The location of each proposed monitoring point (plotted on a suitably-labelled block plan of the site);

B3.10.2: The substances (in each environmental medium) which are proposed to be monitored;

B3.10.3: The frequency with which monitoring is proposed to take place;

B3.10.4: The proposed measurement methodology, which should be a standard methodology, such as EN or ISO standard, or equivalent;

B3.10.5: The proposed procedure for evaluation of the results.

Document reference number:

Volume 2: Chapter 4

B3.11 Emissions & waste summary

By means of a mass flow diagram, summarise the emissions and waste described in sections B3.1, B3.2, B3.3, B3.4, B3.6, and B3.8 of this application.

Document reference number:

Volume 2: Chapter 3 (section B2.2.3)

B4 Impact on the environment

B4.1 Environmental effects

Provide an assessment of the potential significant environmental effects (including transboundary effects) of the foreseeable emissions.

Document reference number:

Volume 2: Chapter 5

B4.2 Effects on other sites

Provide an assessment of whether the installation is likely to have a significant effect on another site in Malta and, if it is, provide an assessment of the implications of the installation for that site.

Document reference number:

Volume 2: Chapter 5

B5 Environmental statements

B5.1 Environmental statement

Has the development of the installation (or any subsequent change or extension of the development) required an environmental statement (EIS or EPS) under LN 204 of 2001 on the assessment of the effects of certain public and private projects on the environment?

Yes No

If yes, please supply a copy of the environmental statement submitted and details of any decision made.

Document reference number:

B6 Statutory consultees

We will use the information in this section to identify who we must consult about your proposals.

B6.1 Local council

In which area is the installation located? If premises are on a boundary please give the names of all the relevant authorities.

Hal Luqa

B6.2 Other sites

Are there any other sites which may be affected by emissions from the installation? (Refer also to your answer to B4.2).

Yes No

If yes, please give the names of the sites:

The following sites were identified following a review of the fire risk of the Scheme:

- Luqa Civic Amenity site (operated by WasteServ Malta)
- EasyGas Malta Limited, Luqa

B6.3 Port Authority

Could the installation involve the release of any substance into a harbour managed by a port authority?

Yes No

If yes, please name the port authority:

B7 Planning status

B7.1 Planning status

Which of the following applies to the proposed installation activities?

We cannot issue a permit unless one of the following applies. Please tick the applicable answer and submit a copy of the relevant documents.

You have planning permission.

Document reference number:

Appendix I

You have a certificate of lawful existing use or development.

Document reference number:

Planning permission is not required - please say why and enclose written confirmation from the Planning Directorate at MEPA.

Document reference number:

If you have submitted an application for planning permission which has not yet been determined, please provide a copy of the application.

Document reference number:

Appendix I

B8 Technically competent person

Technically competent person

We need to make sure that whoever holds the permit is a 'technically competent person'. This includes consideration of relevant offences, technical competence and financial provision.

B8.1 Relevant offences

Has the operator, or any other 'relevant person' been convicted of any relevant offence?

A 'relevant person' includes each partner, director, manager, company secretary or any similar officer or can be an employee, such as a proposed technically competent person.

Yes No

Please provide a recent police conduct certificate for the nominated technically competent person/s.

Document reference number:

Appendix 3

B8.2 Technically competent management

Who will provide the technically competent management for the installation?

Please give details for each person and provide written evidence.

Responsible person 1:

Full Name: Daniel Attard
Position: Director
Date of employment: 13th June 2004
Mobile number: 9942 7330

Document reference number for copies of CV and relevant qualifications:

B8.3 Management of other installations

Are any of these 'Responsible people' already providing the technically competent management at other IPPC installations or at sites licensed under the environmental provisions of the Environment and Development Planning Act, 2010?

Yes No

If yes, please use a separate sheet to give details of these people. For each person we need to know the:

- site/installation name and address;
- licence/permit reference number.

Document reference number for this information:

B9 Expenditure plan

B9.1 Expenditure plan

Please provide a plan of the estimated expenditure for each phase of the following specified activities.

The plan should include the likely costs of:

- monitoring (emission/discharge and ambient monitoring);
- clearing the installation (including drainage systems) of all wastes;
- remedial action in the event of the failure of pollution control systems.

We recognise that this plan may need to be revised before the issue of the final permit.

Document reference number for expenditure plan:

Appendix 5

B10 What to do next

Please read Appendix I, then prepare and sign a covering letter to attach to your application form.

Appendix I Data Protection Clause

In terms of the Data Protection Act (Chapter 440 of the Laws of Malta), we will process any personal and/ or sensitive data supplied on/ in this submission or subsequently supplied by yourself, whether orally or in writing, for all or any of the following purposes:

1. The proper processing of your submission;
2. Internal management, research and statistics;
3. The protection and promotion of our legitimate interests and the proper conduct of our obligations arising under any law or statutory instrument; and
4. To make public the necessary information as specified in the relevant law and/or instrument.

Relevant data will be disclosed or shared as appropriate with all our employees and with other third parties if pertinent to any of the purposes listed above.

You have the right to require that we provide you with access to your **personal data** as well as the right to rectify, or, in appropriate circumstances, erase/edit any inaccurate, incomplete or immaterial personal data which is being processed. However, you are required to inform us immediately of any alterations relating to your personal data which we are processing.

By sending your submission, you confirm that you are giving your explicit consent, in terms of the Data Protection Act, on behalf of yourself and all the other persons specified in this submission for the Authority to process your respective personal information as outlined above and you confirm that you have brought this Data Protection notice to the attention of these other persons and obtained their respective consents.

We undertake to implement appropriate measures and safeguards for the purpose of protecting the confidentiality, integrity and availability of all personal data processed.

Appendix I: Existing Permits and Pending Applications

Environmental Permit

Environment and Development Planning Act (CAP. 504; Act X of 2010)

Permit number
WM 0009/06/K

The Malta Environment and Planning Authority (hereinafter the Authority; the Competent Authority or MEPA) in exercise of its powers under the Environment and Development Planning Act (CAP. 504; Act X of 2010) and the Waste Regulations, 2011 (L.N. 184 of 2011 as amended), hereby authorises:

DDE Attard Ltd
Company registration number: **C 4938**

(hereinafter “the Operator” or “the Permit Holder”),
Of / Whose Registered Office (or principal place of business) is at:

DDE Attard Ltd
3, Scrap Lane
Valetta Road
Luqa, LQA 03, Malta

to carry out waste management activities related to storage and processing of specified non-hazardous waste at:

DDE Attard Ltd
3, Scrap Lane
Valetta Road
Luqa, LQA 03, Malta

to the extent authorised by and subject to the conditions of this Permit.

This permit is valid for **six (6) months** from the original issue date below. An application for renewal of this permit is to be submitted at least six weeks prior to expiry of this permit.

This page has deliberately been left blank

Conditions

1 General

The Permitted Installation shall, subject to the conditions of this Permit, be managed, controlled and operated as described in the Application, or as otherwise previously agreed in writing by the Authority.

Status Log

Detail	Date
<i>Application Received</i>	14 June 2006
<i>Permit Issued</i>	28 April 2009
<i>Renewal Permit</i>	28 October 2010
<i>Renewal Permit</i>	12 December 2011
<i>Varied Permit Issued</i>	02 October 2012
<i>Varied & Renewed Permit Issued</i>	18 December 2012
<i>Varied Permit Issued</i>	08 July 2013
<i>Varied & Renewed Permit Issued</i>	06 November 2013
<i>Varied Permit Issued</i>	12 March 2014
<i>Varied Permit Issued</i>	30 September 2014
<i>Renewal Permit</i>	17 December 2014
<i>Renewal & Variation Issued</i>	14 March 2016

Validity of this permit is for six (6) months; during which the pending documentation related to the IPPC application needs to be submitted to the satisfaction of Authority and in a timely manner. Should the IPPC documentation not be submitted as described, this may impact the future possibility of renewal of the Environmental Permit upon expiry. The use of the shredder will not be permitted after this date.

1.1 Permitted Activities

1.1.1 The Operator is authorised to carry out the activities and the associated activities specified in Table 1.1.1 and in detail in Schedule 1.

Activity	Description of specified activity	Limits of specified activity
Temporary storage and dismantling of specified types of WEEE as per Condition 2.2.1	Receipt, temporary storage & dismantling of specified types of WEEE as per Condition 2.2.1	From receipt of specified WEEE waste to dispatch of dismantled components for recycling to a permitted facility either locally or abroad
Storage and processing of scrap metal	Receipt, storage and processing of scrap metal in designated areas for a period of up to (but not exceeding) 12 months	From receipt of waste metals to dispatch of processed scrap metal to authorised facilities either locally or abroad
Sorting, storage, cutting and baling of waste tyres	Sorting, storage, cutting and baling of waste tyres in designated areas for a period of up to (but not exceeding) 12 months	From receipt of waste tyres to dispatch of end product tyres for authorised use or to authorised waste facility

Storage and processing of wood	Receipt, storage and processing of wood in designated areas for a period of up to (but not exceeding) 12 months	From receipt of waste wood to dispatch of processed wood to authorised facilities either locally or abroad
Operation of a composter	Composting of organic wastes authorised in this permit, in an enclosed system using equipment and mitigation measures specified as part of application	From acceptance of specified organic waste into composting units until dispatch of finished product offsite

1.2 Site

- 1.2.1 The activities authorised under condition 1.1.1 shall not extend beyond the Site, as shown on the Site Map in Schedule 2 to this Permit.

1.3 General Conditions

- 1.3.1 The conditions and obligations of this permit are without prejudice to any other regulation, code of practice, conditions or requirements requested by other Authorities or entities, including but not limited to, the Occupational Health and Safety Authority, Malta Transport and the Malta Resources Authority.
- 1.3.2 This permit is granted saving third party rights. The Permit Holder is not excused from obtaining any other permission required by law. The obligations and conditions deriving from this permit are without prejudice to any other regulations, codes of practice, conditions/requirements imposed by other Authorities, including the need to obtain any development permit.
- 1.3.3 In these conditions and their interpretation, all terms shall have the same meaning as that assigned to them in the Waste Regulations, 2011, as published by Legal Notice 184 of 2011 as amended or any statutory provisions or regulations amending or replacing them.
- 1.3.4 The waste management activities on site shall be managed without endangering human health or harming the environment, in particular:
- a. Without risk to water, air, soil, plants and animals;
 - b. Without causing a nuisance through noise, dust or odours;
 - c. Without adversely affecting the countryside or places of special interest or value.
- 1.3.5 The Permit Holder is to be fully liable and responsible for managing the site in all its various aspects and to supervise the full adherence with all the conditions of this permit.
- 1.3.6 The site must be well secured to minimise the opportunity for unauthorised entry.
- 1.3.7 The company shall maintain a register of third party complaints. The register shall record the name and address of the complainant(s), the date, location, source and nature of the complaint and the corrective action undertaken, where such action proves necessary.
- 1.3.8 In the event of cessation of business activity on the site, all wastes (including machinery, tanks, equipment) must be removed from the site such that any pollution risk is avoided and the site is returned to a satisfactory state. The Operator shall notify the Authority immediately upon a decision being taken to cease business activity, and shall submit a decommissioning plan to the Authority for approval.

- 1.3.9 All plant, equipment and technical means used in operating the Permitted Installation shall be maintained in good operating condition and without causing potentially polluting leaks and spillages. The operator shall keep maintenance records.
- 1.3.10 The Permitted Installation shall be managed, controlled, supervised and operated by staff who are aware of the importance of environmental protection and suitably trained on the requirements of this Permit, in particular on those permit conditions relevant to their duties. All staff shall be provided with adequate training and written operating instructions to enable them to effectively carry out their duties. Such training shall be recorded.
- 1.3.11 This Permit is not transferable unless by application to the Authority, whereby the permit will be transferable only after an official letter from the Authority endorses the permit transfer. Transfer of ownership will also necessitate the transfer of environmental obligations and liabilities.
- 1.3.12 The Authority shall carry out regular compliance checks and audits that vary in frequency according to the site's compliance with the permit conditions. Any such checks and audits carried out by the Authority are to be made at the Permit Holder's financial expense.
- 1.3.13 The Authority's representatives are empowered to inspect every part of the site and ask for any closed or locked areas to be opened. They are also entitled to be given any proof, documentation, plans, receipts or any other records which these Authority representatives may request.
- 1.3.14 The Authority reserves the right to alter, amend or remove any of the conditions of this permit after notifying the Permit Holder of its intention and after describing the changes to the Permit Holder.
- 1.3.15 The Permit Holder is able to request the Authority to change or amend any of the conditions of this permit with which the Permit Holder is no longer in a position to achieve compliance by applying for a Variation Notice. The changes in the permit conditions are only affected once official documentation from the Authority notifies the Permit Holder that the Variation Notice is in affect. Until such a time, the permit holder retains the responsibility to achieve full compliance with these conditions.
- 1.3.16 The validity of this permit is until **14 September 2016**. The Permit Holder is able to renew the permit upon application with the Authority expressing his/her intention at least six (6) weeks prior to the expiry of the permit. An application for the renewal of the Permit will only be accepted by the Authority subject to Condition 4.5.1 being fulfilled. The permit will be considered renewed once the official Variation Notice is issued by the Authority.
- 1.3.17 This permit is issued against a bank guarantee of **€ 5,000 (Financial Guarantee Number G41TFC16625 dated 24 October 2013)** and is to be renewed annually. The Authority reserves the right to take part or all of the financial guarantee if the Permit Holder fails to take the necessary action in cases of non-compliance with these permit conditions or in cases where environmental integrity is threatened. This bank guarantee is without prejudice to any environmental liabilities incurred by the operator through failure to adhere with permit conditions.
- 1.3.18 In cases where the financial guarantee does not cover the expenses incurred by the Authority to take remedial action on the Permit Holder's behalf, the Permit Holder is to financially reimburse the Authority of all the expenses incurred.
- 1.3.19 A copy of this permit should be available at all times at the site office, including any Variation Notices or amendments to it.

- 1.3.20 The Authority may suspend or revoke this environmental permit or part of this environmental permit where significant mismanagement of the site is observed or any of the permit conditions are not respected after a written warning is given by the Authority or in any eventuality that gives the Authority enough reason to revoke this permit.
- 1.3.21 The Permit Holder is able to surrender this environmental permit **only after** applying with the Authority. The Permit Holder shall retain all responsibility for management and activities within the site until the Authority officially approves the permit surrender in writing.
- 1.3.22 The Authority reserves the right to attach a fee to this permit.

1.4 Operational Changes

- 1.4.1 The operator shall seek the Authority's written agreement to any operational changes which could cause impact on the environment (including introduction of new waste streams, processes or equipment) by sending to the Authority: written details of the proposed change, including an assessment of its possible effects (including changes in emission and waste production) on risks to the environment from the Permitted Facility; any relevant supporting documentation or drawings, and the proposed implementation date.
- 1.4.2 Any such change shall not be implemented until agreed in writing by the Authority. As from the agreed implementation date, the operator shall operate the Permitted Installation according to that change, and relevant positions in the Application shall be deemed to be amended.

1.5 Improvement Programme

- 1.5.1 The Operator shall complete the improvements specified in Table 1.5.1 by the date specified in that table.

Table 1.5.1: Improvement programme		
Reference	Requirement	Deadline
1	Operator is to provide a method statement as to the testing and analysis to be carried out on the composted material, making reference to standards to be used, for approval by the Authority	Within 1 month of issue of this permit
2	End result of the composted material is to be tested and results presented to the Authority.	Within 3 months of 1 st operation of the composter
3	Operator is to carry out onsite monitoring for emissions. The operator is to submit an air monitoring plan for any emissions (inc. fugitives) arising from the composter operations.	Within 4 weeks of the commissioning of the composter

2. Site Infrastructure and Operations

2.1 Site Infrastructure

- 2.1.1 During non-operating hours the site should be firmly closed and totally inaccessible to third parties, both by vehicle and on foot.

- 2.1.2 A quarantine area is to be designated within the site boundary to temporarily hold unpermitted waste that may enter the site (refer to Section 3). A non leaking skip or similar contained structure can be utilised for the temporary storage of unpermitted waste.
- 2.1.3 The site should be clearly identified by a site identification board, which should be replaced as soon as it is damaged or the information is no longer readable from a distance. The site identification board should be located at the site entrance and should contain the following information:
- a. The company name and address
 - b. List of authorised activities on site
 - c. 24 hour emergency mobile number
 - d. Permit Number (making it clear this site is permitted by the Authority)
 - e. Opening hours of the site
- 2.1.4 All handling, storage and treatment of materials or waste shall take place only in areas with impervious ground and where thorough clean up and site reinstatement can be readily undertaken.
- 2.1.5 No waste shall be deposited, stored, treated or otherwise handled in any area of the site until the engineered site containment and drainage system for that area has been constructed and completed in accordance with this condition.
- 2.1.6 Engineered site containment and drainage systems shall be designed, constructed, inspected, validated and maintained; and shall be fully documented and recorded to be fit for purpose while meeting the following construction quality assurance standards. All areas are to be:
- fully impermeable
 - kept free from cracks which could increase permeability
 - are to be certified as being resistant to physical, mechanical and chemical stresses to which they may be subjected
 - fall towards the drainage system to prevent pond formation
- 2.1.7 The drainage system must be sealed so that it does not leak and is capable of collecting and containing runoff and other liquids draining from the impermeable pavement.
- 2.1.8 The area for the production and storage of compost shall be provided with an adequately designed bund system with an impermeable base and walls to avoid spillages or contamination.
- 2.1.9 Operation of the composter may only commence once the installation of the shed and any abatement measures related to the production and storage of compost as indicated during the application process has been completed.

2.2 Permitted Operations on Site

- 2.2.1 Only waste streams as set out in the European Waste Catalogue codes in Schedule 1 can be accepted and processed on site, according to the approved methods as set out during the application process. With regards to WEEE, only the following types of WEEE may be accepted and treated on site:
- washing machines,
 - cookers,
 - water meters

Any other types of WEEE (whole or dismantled components) are strictly prohibited.

- 2.2.2 Only metals dismantled from non-hazardous WEEE at authorised WEEE facilities can be accepted on site.

- 2.2.3 The total quantities of waste accepted at the site per year shall not exceed any value the Site can treat during the year. The total amount of waste that can be stored at any given time cannot exceed the capacity of the permitted site boundaries. With regards to hazardous wastes in particular, storage of such waste may not exceed 50 tonnes at any given time.
- 2.2.4 All wastes leaving the site after storage and/or processing must be recorded and only be sent to facilities licensed to accept the individual waste stream, either locally or abroad.
- 2.2.5 The treatment including crushing of waste gas cylinders is not permitted on site unless a method of how this is done in an appropriate manner as approved by the Competent Authority.
- 2.2.6 Waste tyres and wood should be segregated from other wastes and relevant fire fighting equipment should be kept within close proximity to this waste stream. Storage, cutting and baling of tyres may only take place within the area designated for this activity during the variation process.
- 2.2.7 Testing and analysis of the composted material will need to be carried out to determine whether this has reached the required standards to achieve the end-of-waste status for a product, in this case compost.
- 2.2.8 The operator is to provide a method statement as to the testing and analysis to be carried out on the composted material, making reference to standards to be used, for approval by the Authority within 1 month of issue of this permit.
- 2.2.9 Until the results of such testing and analysis has been submitted to and approved by the Authority, no movement of the composted material off-site is permitted, whether for storage, re-use or disposal.
- 2.2.10 Should the resultant analysis be accepted by MEPA as satisfying the End of Waste criteria as per provisions of The Waste Regulations 2011, as published by Legal Notice 184 of 2011, as amended by L.N. 441 of 2011 or any statutory provisions or regulations amending or replacing them; then the compost resulting from the permitted types of biowaste may be utilised to a dedicated use such as soil improver, fertiliser, etc, following receipt of written consent from the Authority.
- 2.2.11 Should the operator wish to use the end product (compost) as a product, the Operator shall submit to the Authority a declaration (for the substance) as set out in Schedule 10 of Legal Notice 184 of 2011, as amended by L.N. 441 of 2011 or any statutory provisions or regulations amending or replacing them.
- 2.2.12 End-of-life vehicles carcasses may only be accepted where these have been fully depolluted and all hazardous components have been removed, including the following:
- Batteries
 - Liquefied gas tanks
 - Explosive components (e.g. airbags)
 - All oils and liquids (including but not limited to motor oil, transmission oil, gearbox oil, cooling liquid, antifreeze, brake oil, etc.
 - Any parts containing mercury
 - Catalysts
 - Components containing copper, aluminium and magnesium (unless these are segregated during the shredding process)
 - Tyres
 - Glass
 - Large plastic components (including but not limited to car bumpers, dashboards, fluid containers) unless these can be recovered during

the shredding process in such a way as to be effectively recycled and not disposed of at landfill

- Any components falling under any of the categories as described in Schedule 1 of L.N 99 of 2004 Waste Management (End of Life Vehicles) Regulations

2.3 Hours of Operation

2.3.1 Without prejudice to any code of practice or any other regulations or agreements between or from other Authorities or governmental bodies, the waste management operations authorised by this Permit shall only be carried out within the times specified below:

Monday to Friday:	07:00 – 17:30
Saturday:	07:00 – 13:00
Sunday and Public Holidays:	Closed

3. Operating Conditions

3.1 Emissions

3.1.1 Emissions to Air

3.1.1.1 All emissions to air from the specified waste management operations shall be free from visible concentrations of dusts, fibres or particulates that are likely to cause pollution of the environment or harm to human health or serious detriment to the amenity of the locality outside the Site, as perceived by an authorised officer of the Authority.

3.1.1.2 In the event of a local nuisance from emissions to air, the operator must, at the written request of MEPA and within 10 working days, identify the specific cause of the nuisance and examine means for its elimination.

3.1.1.3 The Operator shall carry out onsite monitoring for emissions. The operator is to submit an air monitoring plan for any emissions (inc. fugitives) arising from the composter operations. This plan shall be submitted within 4 weeks of the commissioning of the composter.

3.1.2 Effluent Discharges

3.1.2.1 No discharges to surface water or groundwater shall take place from the Permitted Installation.

3.1.2.2 No discharges to the foul sewer (other than from domestic sewage or equivalent) shall take place from the Permitted Installation.

3.1.2.3 The Operator shall undertake all necessary measures and precautions to prevent spillage of raw materials, intermediates, products, waste and any other materials.

3.1.2.4 All process and storage areas must be appropriately contained. Any accidental release of substances shall be duly treated prior to discharge into the sewers, or disposed/recovered to the satisfaction of the Authority.

3.1.2.5 The Operator shall ensure the Sewer Discharge Permit from the Water Services Corporation is updated every year. The Operator shall abide to the provisions indicated in the Sewer Discharge Permit.

3.1.2.6 The Operator shall follow the conditions of the Sewer Discharge Permit , as may be updated from time to time by the Water Services Corporation and the provisions of the Sewer Discharge Control Regulations (LN139 of 2002 as amended by LN378 of 2005 and as may be amended from time to time).

3.1.3 Emissions to Land

3.1.3.1 No emission from the Permitted Installation shall be made to land.

3.1.4 Odour

3.1.4.1 The Operator shall prevent or where that is not practicable, reduce odorous emissions from the Permitted Installation so as not to cause nuisance to Third parties. The Operator is to ensure that all measures to limit odours are implemented on site both during operational and non-operational hours.

3.1.4.2 Emissions from the activities shall be free from odour at levels likely to cause pollution and/or nuisance outside the site and at sensitive receptors, as perceived by the Authority.

3.1.4.3 Filters for odour abatement are to be maintained and replaced according to manufacturers guidelines, and record of such replacement/maintenance is to be kept for viewing by officers of the Authority upon request.

3.1.4.4 The Operator shall prevent or where that is not practicable, reduce odorous emissions from the Permitted Installation, in particular by:

- limiting the use of odorous materials;
- restricting odorous activities;
- controlling the storage conditions of odorous materials;
- controlling processing parameters to minimise the generation of odour;
- optimising the performance of abatement systems;
- timely monitoring, inspection and maintenance;
- employing, if required by the Authority, an approved odour management plan.

3.1.4.5 Should odour problems persist, the Operator shall:

- a) investigate immediately and undertake corrective action, and
- b) adjust the process or activity to minimise those emissions, and
- c) record the events and actions taken.
- d) in the event of non-compliance causing immediate danger to human health, operation of the activity must be suspended and the Environmental Health informed within 24 hours.

3.1.4.6 Should it be determined by the Authority that the odour control measures in place on site are insufficient, the Authority reserves the right to request installation of additional odour abatement measures to be implemented within a specified timeframe as provided in writing.

3.1.5 Monitoring

3.1.5.1 The Authority reserves the right to request for additional monitoring (for both onsite and offsite monitoring for any emissions, noise and odour), as deemed necessary by MEPA. Such monitoring shall be carried out at the expense of the Permit Holder.

3.1.6 Noise and Vibration

- 3.1.6.1 The Operator shall prevent or where that is not practicable reduce emissions of noise and vibration from the Permitted Installation.
- 3.1.6.2 The Authority shall reserve the right to request a noise monitoring analysis, at the expense of the Permit Holder. In this regard, the locations, measurements and assessment must be made according to BS 4142:1997, all the series of ISO 1996, ISO 9613 and any other standard methodology stipulated by the Authority. This shall be subject to the submission of a method statement and subsequent approval by the authority prior to the commencement of any monitoring.

3.1.7 General Waste Acceptance, Storage and Handling

- 3.1.7.1 The Permit Holder shall apply the precautionary principle to safeguard the environment whilst carrying out the permitted activities and should immediately refuse the entry of waste that is suspected to be in breach of the conditions of this permit.
- 3.1.7.2 The Permit Holder shall ensure that all waste management operations authorised in accordance with this Permit are carried out in an orderly manner and in such a way as to cause the least possible disturbance to the surroundings and the least possible nuisance to third parties.
- 3.1.7.3 No acceptance, storage, treatment or recovery of liquid or hazardous waste is allowed on site.
- 3.1.7.4 All wastes shall be stored within a designated and controlled storage area(s) prior to ultimate disposal. Any unpermitted wastes that may inadvertently enter the site must be stored in a clearly defined quarantine area and not be mixed with other wastes on site.
- 3.1.7.5 Any hazardous wastes shall be stored in a designated and controlled storage area(s) prior to ultimate disposal. Dismantled components of WEEE shall not be mixed together in the same container. Wastes of different natures shall also be kept separated.
- 3.1.7.6 The Operator shall maintain records of the weight of each waste consignment received and/or removed from the site, and such data is to be collected using a properly calibrated scale. Operator is to submit details of the scale used, together with its location and calibration details. Records of waste weighed prior to loading onto the vehicle from the point of collection may be accepted in lieu of on site weighing.
- 3.1.7.7 The Permit Holder shall ensure to issue a receipt for every consignment of wastes accepted and removed on Site indicating the date and time of the consignment and the weight of the waste received. Each receipt should indicate the site name and permit number, as well as bearing a unique sequential number. Where applicable, this also applies to any Recycling Certificates issued by the operator as part of any recycling scheme.
- 3.1.7.8 Only biodegradable organic green waste is to be accepted in the composter. This shall be stored in closed skips and/or closed containers prior to treatment in composter. No animal by-products may be accepted in the composter.
- 3.1.7.9 The operator is to ensure that the temporary storage of incoming waste stored at the facility is for a maximum of 48 hours prior to treatment (if not processed on same day). The number of wheelie bins (kept closed to eliminate potential odours) stored onsite during this 48 hour period will be limited to a maximum of 4 bins. This equates to a maximum of 250kgs of waste onsite pending treatment.

- 3.1.7.10 Composted material arising from the composting activities on site shall be stored in such a way to prevent odour nuisance.
- 3.1.7.11 Compost not reaching the End of Waste criteria according to the Waste Framework Directive (Commission Regulation EC N° 2008/98) shall be disposed of in an authorised facility permitted to accept such waste.
- 3.1.7.12 Should the operator wish to process other types of WEEE besides those indicated during the variation application process, the operator must obtain another variation to permit from the Competent Authority prior to any further WEEE types being accepted or processed on site.
- 3.1.7.13 Only types of non-hazardous and hazardous WEEE as specified in Condition 2.2.1 and Condition 2.2.2 can be accepted on site. All WEEE dismantling is to be carried out indoors.
- 3.1.7.14 No storage of waste is permitted for a period exceeding 12 months.
- 3.1.7.15 The operator is to prevent litter or other wastes escaping from the site boundaries, particularly during loading/unloading. Any such escape of waste shall be collected immediately upon detection.
- 3.1.7.16 Only registered waste carriers as per activity 38 of schedule 1 in the Waste Management (Activity Registration) Regulations, 2007 as published by Legal Notice 106 of 2007 are allowed to transport waste to and from this site.
- 3.1.7.17 Transboundary movement of waste shall be carried out in accordance with the following regulations, as amended from time to time:
- a. Regulation (EC) N° 1013/2006 of the European Parliament and of the Council of 14 June 2006 on shipments of waste
 - b. Commission Regulation (EC) N° 1379/2007 of 26 November 2007 amending Annexes IA, IB VII and VIII of Regulation (EC) N° 1013/2006 of the European Parliament and of the Council of Shipments of waste, for the purposes of taking account of technical progress and changes agreed under the Basel Convention; and
 - c. Commission Regulation (EC) N° 1418/2007 of 29 November 2007 concerning the export for recovery of certain waste listed in Annex III or IIIA to Regulation (EC) N° 1013/2006 of the European Parliament and of the Council to certain countries to which the OECD Decision on the control of transboundary movements of waste does not apply.
 - d. Any other Regulation which the Commission puts into force from time to time which are directly related to the transboundary movement of waste.
- 3.1.7.18 Disposal certificates shall be kept on record and made available for inspection for a period of at least 4 years from date of their issue.
- 3.1.7.19 All hazardous waste transferred off the site from the quarantine area shall be accompanied by a valid hazardous waste Consignment Permit issued by MEPA. Each consignment under the consignment permit should be accompanied by a Consignment Note.

4. Site Management

4.1 Staff obligations and Responsibilities

- 4.1.1 All employees on site should be fully conversant with the obligations of this permit and should be individually aware of their responsibilities and liabilities in observing the conditions of this permit.
- 4.1.2 One member of the staff should be nominated as the Technically Competent Person (TCP) of the site, whereby this person is to physically represent the Permit Holder during the times when the Permit Holder will not be available.
- 4.1.3 The TCP is responsible for the implementation of all the obligations stipulated in this permit, must supervise the rest of the staff on site and is completely responsible to ascertain that all permit conditions are being adhered to and that unauthorised waste does not enter the site.
- 4.1.4 The TCP is to be present at all times on site and in her/his absence another member of staff is to substitute him/her temporarily. In the event that a TCP terminates her/his employment, another person shall be appointed as a TCP immediately and the Authority shall be informed of this change.
- 4.1.5 In the event where operations cease temporarily, the TCP or Permit Holder are obliged to notify the Authority within two (2) days and are also to inform the Authority with regards to when the works are intended to resume.
- 4.1.6 All the staff on site should be fully aware of the procedures to be taken to contain any environmental hazard which may arise related to the activities being carried out on site.

4.2 Control of Mud, Debris & Emissions

- 4.2.1 At all times during the year the Permit Holder and/or TCP are to ascertain that the roads leading to the facility are clean and free of mud or large debris. In the event that mud or large debris is observed on the road the Permit Holder and/or TCP is to take remedial action and ascertain that the roads are immediately cleaned.

4.3 Accident Prevention and Control

- 4.3.1 An Emergency Response Plan shall be maintained containing details of the location, nature and quantity of chemicals, oils and fuels stored, any special hazards, a drawing showing location of drains and the emergency phone numbers of the operator and relevant authorities. It shall also include actions to be taken in the case of incidents which could affect the environment, such as fires and chemical/fuel spills. The emergency plan shall indicate that accidental releases of chemicals and fires caused by chemicals are to be managed as specified in the respective MSDS sheets.
- 4.3.2 The emergency response plan shall be updated whenever necessary and the updated version sent to MEPA and the Civil Protection Department.
- 4.3.3 In the case of an accident (including fire, chemical spills, etc.), the Operator shall follow the Emergency Response Plan referred to in Condition 4.3.1 and, in the case that such accident could reasonably be regarded as causing environmental damage or as posing a threat of environmental damage, the operator shall notify the Authority within 24 hours.

4.4 Control of pests, birds and other scavengers

- 4.4.1 The Operator shall prevent or where that is not practicable reduce and control the presence of pests, birds and other scavengers from the Permitted Installation so as to not to cause harm to human health and the environment.

4.5 Site Records & Archive

- 4.5.1 A site diary should be kept on site in which the following information shall be recorded on a daily basis:
- i. Total amount of waste in kilos accepted on site
 - ii. Total amount of waste in kilos removed from site for disposal or further treatment
 - iii. Total amount of waste in kilos refused entry on site
 - iv. Total amount in kilos of unaccepted material sent to the quarantine area and by which registered waste carrier it was transported
 - v. Any incidents that took place on site such as mechanical faults in the machinery or equipment used on site, any spills, fires, etc and the remedial action taken
 - vi. Names of visitors
 - vii. Any other incidents that the Permit Holder deems important to record in the Site Diary.

Each event recorded within the site diary must be completed within 24 hours of the event.

- 4.5.2 The Operator shall ensure that all records required to be made by this Permit and any other records made by it in relation to the operation of the Permitted Installation shall:
- i. be made available for inspection by the Authority at any reasonable time;
 - ii. be supplied to the Authority on demand and without charge and in the format requested;
 - iii. be legible;
 - iv. be made as soon as reasonably practicable;
 - v. indicate any amendments which have been made and shall include the original record wherever possible; and
 - vi. be retained at the Permitted Installation, or other location agreed by the Authority in writing, for a minimum period of 3 years from the date when the records were made, unless otherwise agreed in writing.

4.6 Reporting

- 4.6.1 The Operator shall submit to the Authority an Annual Environmental Report (AER) of the previous year by not later than end of March of each year, providing the information listed in the MEPA website and in the format specified therein (<http://www.mepa.org.mt/wastemanagementfacilities-template>).
- 4.6.2 A summary record of the waste quantities accepted and removed from the Site shall be made annually and shall be submitted to the Authority as part of the AER. The summary record shall be in the format specified in accordance with Condition 4.6.1 of this permit and shall be submitted no later than 31st March following closure of each reporting year.
- 4.6.3 An independent auditor shall be engaged by the Operator to certify all of the waste reporting required by this permit, in line with the Terms of Reference found in Schedule 3 of this permit.

- 4.6.4 In the case of waste that is sent for treatment or recovery to another facility locally or abroad, the audit trail shall cover all waste from the point of generation or collection to the end recovery or disposal facility.

Schedule 1

Complete List of Permitted Waste on Site

European Waste Codes	Description of Waste
Incoming	
02 01 10	Waste metal
03 01 05	Sawdust, shavings, cuttings, wood, particle board and veneer other than those mentioned in 03 01 04
15 01 03	Wooden packaging
15 01 04	Metallic packaging
16 01 03	End-of-life tyres
16 01 06	End-of-life vehicles, containing neither liquids nor other hazardous components
16 01 17	Ferrous metal
16 01 18	Non-ferrous metal
16 02 13*	Discarded Equipment containing hazardous components (washing machines, cookers and water meters only)
16 02 16	Non-hazardous WEEE (waste metals dismantled from WEEE only)
17 02 01	Wood
17 04 01	Copper, bronze, brass
17 04 02	Aluminium
17 04 03	Lead
17 04 04	Zinc
17 04 05	Iron and steel
17 04 06	Tin
17 04 07	Mixed metals
19 12 02	Ferrous metal
19 12 03	Non-ferrous metal
19 12 07	Wood other than that mentioned in 19 12 06
19 12 04	Rubber
20 01 35*	Discarded electrical and electronic equipment other than those mentioned in 20 01 21 , 20 01 23 and 20 01 35 (washing machines, cookers and water meters only)
20 01 38	Wood other than that mentioned in 20 01 37

Outgoing	
16 02 16	Non-hazardous WEEE (waste metals dismantled from WEEE only)
17 02 01	Wood
17 04 01	Copper, bronze, brass
17 04 02	Aluminium
17 04 03	Lead
17 04 04	Zinc
17 04 05	Iron and steel
17 04 06	Tin
17 04 07	Mixed metals
17 04 11	Cables other than those mentioned in 17 04 10
19 12 02	Ferrous metal
19 12 03	Non-ferrous metal
19 12 07	Wood other than that mentioned in 19 12 06
19 12 04	Rubber
20 01 38	Wood other than that mentioned in 20 01 37
20 01 40	Metals

Schedule 2 Site Map

Fig. 2.1: Site of permitted installation, showing extent of permitted area in blue.

Schedule 3

Audit Procedures – Terms of Reference

#	Nature and extent of audit procedures	Timing	Done by and date	Signature
1	<p>Objective: To confirm that there is a signed receipt for every waste consignment received at the site</p> <ul style="list-style-type: none"> Choose a random sample of 10% of the total no. of working days and confirm that all waste entries are covered by an issued signed receipt. 			
2	<p>Objective: To confirm that any hazardous waste movements from the site (entry & exit) are covered with a Hazardous waste consignment permit and consignment note</p> <ul style="list-style-type: none"> Choose a random sample of 10% of the total no. of hazardous waste movements out of the site and confirm that all such movements are covered by a valid Hazardous waste consignment permit and a waste consignment note. Choose a random sample of 10% of the total no. of hazardous waste movements into the site and confirm that all such movements are covered by a valid Hazardous waste consignment permit and a waste consignment note. 			
3	<p>Objective: To verify whether the quantities reported by the Waste Facility make reasonable sense</p> <ul style="list-style-type: none"> Choose a random sample of 10% of the total no. of working days at the facility and confirm that all waste entries (in and out of the site) reported are verified by relative documentation. 			
4	<p>Objective: To ensure that the waste vehicles used to by the authorised facility to transfer the waste to other permitted sites are registered with MEPA</p> <ul style="list-style-type: none"> Obtain a list of approved waste carriers from MEPA and confirm that the ones used by facility are registered with MEPA 			

5	<p>Objective: To ensure that the waste management facilities used by the authorised facility are approved by MEPA or the Competent authority of the Country of Destination</p> <ul style="list-style-type: none"> • Obtain a list of locally approved waste management facilities from MEPA and confirm that the ones used by the facility are approved and authorised by MEPA • Obtain a copy of the permits of any foreign authorised waste management facilities which have been utilised. An original copy of the permit and an approved translated version of the permit is to be presented to MEPA 			
6	<p>Objective: To ensure that the declared quantities of waste exported during the previous calendar year were actually received at the authorised facilities and declared to MEPA</p> <ul style="list-style-type: none"> • Obtain all certificates received from recycling facilities and confirm that these have all been declared to MEPA prior to shipment • Confirm arithmetical correctness of all reported data in this regard. 			
7	<p>Objective: To identify the waste being exported and to confirm the end destination of these materials, has been recovered appropriately</p> <ul style="list-style-type: none"> • Identify the materials exported according to the EWC Code and review actual documentation (including bills of lading) confirming an audit trail showing that the waste has been sent to a recovery facility as per permit requirements.

Location: Site at Don Kotra, Sqaq fdal il-Hadid, Luqa
Proposal: Proposed upgrading of existing scrapyards (scrapyard has been in operation for over 50 years). Proposal includes construction of boundary fence; installation of weigh bridge and tyre cleaning facility; paving of site; and landscaping works.

**Environment and Development Planning Act, 2010
Full Development Permission**

The Malta Environment & Planning Authority hereby grants development permission in accordance with the application and documents described above, subject to the following conditions:

- 1 This development permission is subject to a bank guarantee to the value of €3,000 (three thousand euro) to cover any failure to implement the landscaping scheme or to maintain the landscaping to the satisfaction of the Malta Environment and Planning Authority. This bank guarantee shall be managed as follows:
 - i) the bank guarantee shall be reduced by €500 (five hundred euro) to a balance of €2,500 (two thousand five hundred euro) on planting of the whole landscaping scheme and effective irrigation. Planting shall be carried out within the first planting season following completion of the development hereby approved, failing which the bank guarantee shall be forfeited.
 - ii) the bank guarantee shall be reduced by a further €1000 (one thousand euro) to a balance of €1,500 (one thousand five hundred euro) after two years of planting and subject to effective maintenance of landscaping. Any trees that die or become severely diseased shall be replaced with the equivalent or greater number of trees of the same species and age as soon as planting is possible.

PA/05538/07

Print Date: 14/04/2014

iii) the remaining balance of €1,500 (one thousand five hundred euro) will expire after five years from planting, subject to maintenance of landscaping. Any trees that die or become severely diseased shall be replaced with the equivalent or greater number of trees of the same species and age as soon as planting is possible.

In the event that the applicant fails to implement the scheme within the stipulated time limit, or fails to properly maintain the landscaping, the outstanding bank guarantee shall be immediately forfeited. Its forfeiture would not, however, preclude the Authority from taking any action to ensure that the conditions of this permission are adhered to and the approved drawings/documents are complied with.

2 The development hereby permitted shall be subject to Final Compliance (Completion) Certification, verifying that the development has been carried out in full accordance with the approved drawings, documents and conditions imposed of permission. Prior to the issuing of the Final Compliance Certificate for this development, the applicant shall submit to MEPA:

(i) certification from a qualified engineer confirming that the development fully satisfies the requirements specified in report PA 5538/07/94F;

(ii) certification from a qualified engineer confirming that the flood-lighting is in line with the requirements of condition number 4b of this development permission;

(iii) an independent warranted engineer shall certify that the interceptors and surface runoff reservoir are of appropriate size and design to cater for the runoff of the entire hard-standing surface of the site.

3 The conditions imposed and enforced by the Malta Resources Authority and the Environmental Health Directorate are at documents PA 5538/07/132A and PA 5538/07/110A respectively.

The architect/applicant are required to contact the Malta Resources Authority and the Environmental Health Directorate, throughout all the construction phases of the development hereby approved, to ensure that the development is carried out in conformity with the conditions imposed by the said entities respectively.

4 a) No apertures or railings shall be constructed of gold, silver or bronze aluminium.

b) The development is not to be a source of light pollution, especially at night. To this effect:

(i) lighting should be strictly limited to within the developed part of the site;

(ii) the development hereby being permitted should not be considered as a justification for the lighting of the access roads, tracks and paths leading to the site or other lighting beyond the site boundary;

(iii) the lighting has to be from any peripheral landscaping inward, so as to be screened as much as possible by the landscaping itself; and

(iv) all exterior lighting installed on site is to be of the downward-pointing, full cut-off type. No luminaire globes or uplighters are accepted.

5 The planting of trees shall be carried out in accordance with good arboricultural practice

and without the cutting of primary branches or trunks of the trees.

- 6 This development permission does not entail the uprooting of existing trees including also those listed in Schedule I or II of Legal Notice 200 of 2011 and any natural habitats and the demolition and/or carrying out of significant alterations of any random rubble boundary walls or any non-habitable rural structures. Measures should therefore be taken to ensure that works are carried out in such a manner as to not damage or undermined in any way such features.
- 7 The fence shall be constructed on the inner side of the planted margin in accordance to approved drawings PA 5538/07/121b/134a.
- 8 The construction of rubble walls along the site's perimeter as indicated on PA 5538/07/121b/134a shall be carried out strictly in accordance with the requirements of Legal Notice 160 of 1997 (as amended by Legal Notice 169 of 2004), and shall be subject to the following conditions:
- Works are strictly limited to the construction of rubble walls ("ħitan tas-sejgieħ"). The walls are to be constructed in loose, unhewn random rubble stones which stand by gravity and friction without the use of mortar.
 - No other extraneous material including concrete, franka blocks, bricks, or disused concrete slabs are to be incorporated into the walls.
 - The walls shall not exceed the height of 1.2 metres.
 - The works required for the construction of the walls in question must not overspill onto, or cause any damage to, the surroundings of the site.
 - The works shall not be allowed to result in direct or indirect damage to (or demolition of) any other existing rubble walls or to any other structure protected by Legal Notice 160 of 1997.
 - Cladding, facing and the use of mortar is not acceptable. In this respect, any mortar already used during the recent construction of existing rubble walls shall be removed.
 - No new walls, partitioning of land, encroachment beyond the site boundary, levelling of land, and reclamation of land, are allowed.
 - No fences shall be erected on the rubble walls.

Prior to the issue of any compliance certificate on the site, all the above criteria are implemented in their entirety. Any failure to comply with the terms of this permit shall be considered as an infringement of the above-mentioned legal notices and shall incur the relevant penalties, without prejudice to any additional enforcement action as may also be applicable.

- 9 The development must not involve or require any new access routes (and/or modification of existing access routes) beyond the land area delineated on PA 5538/07/121b. Access to the site shall be exclusively as shown on PA 5538/07/121b. In the event that the access

becomes inoperable, inadequate or insufficient, for whatever reason, the permit shall in no way bind the Authority to approve any alternative route even if essential for continued operation of the development.

- 10 All material, structures, vehicles and machinery used for, or generated by, the works are to be entirely confined to the site approved for development and/or the land area occupied by the existing road carriageways. No overflows or vehicular trampling/maneuvering beyond such land area are to be allowed. This applies to both the construction/site preparation phase and the operational use of the site.
- 11 a) The approved premises shall be used as indicated on the approved drawings or as limited by any condition of this permission.
- b) Unless shown on the approved drawings, no approval is hereby granted for the display of any sign or advertisement. These must form the subject of a separate application for advertisement consent.
- c) The premises shall be used only as a waste management facility and for no other purpose, including any use falling within Class 11 or Class 12 of the Development Planning (Use Classes) Order, 1994 (or its subsequent amendments). This development permission does not signify that the building hereby permitted may eventually be allowed to be put to any use other than those indicated on PA 5538/07/121b. In the event that the development hereby permitted ceases to operate and/or is no longer being used for the approved uses, the buildings should be demolished/ dismantled and removed from site, at the expense of the applicant. The site shall be completely restored to its pristine state to the Malta Environment and Planning Authority's satisfaction in accordance with a method statement approved in advance by the Environment Protection Directorate, within a specific time period as stipulated by the Authority.
- 12 a) This development permission is valid for a period of FIVE YEARS from the date of publication of the decision in the press but will cease to be valid if the development is not completed by the end of this validity period.
- b) This permission relates only to the development as specifically indicated on the approved drawings. This permission does not sanction any other illegal development that may exist on the site.
- c) Copies of all approved drawings and documents shall be available for inspection on site by MEPA staff at all reasonable times. All works shall be carried out strictly in accordance with the approved drawings, documents and conditions of this permission. Where a matter is not specified, then the conditions of this permission and of Development Control Policy and Design Guidance shall take precedence and shall modify the drawings and documents accordingly.
- d) Where applicable, all building works shall be erected in accordance with the official alignment and official/existing finished road levels as set out on site by MEPA's Land Surveyor. The Setting Out Request Notice must be submitted to the Land Survey Unit of MEPA when the setting out of the alignment and levels is required.
- e) Where an officially schemed street, within the development zone, bordering the site is unopened or unformed, it shall be opened up and brought up to its proper, approved and

official formation levels prior to the commencement of any development hereby being permitted.

f) Before any part of the development hereby permitted commences, the enclosed green copy of this development permission shall be displayed on the site. This must be mounted on a notice board, suitably protected from the weather and located not more than 2 metres above ground level at a point on the site boundary where it is clearly visible and can be easily read from the street. The copy of the permission must be maintained in a good condition and it shall remain displayed on the site until the works are complete.

g) The enclosed Commencement Notice shall be returned to MEPA so that it is received at least five days prior to the commencement of any works hereby permitted.

h) Where applicable, the development hereby permitted shall be carried out in accordance with the provisions of the Environmental Management Construction Site Regulations, Legal Notice 295 of 2007 (or subsequent amendments). Any hoarding shall be erected in accordance with Schedule 2 of the same Regulations.

i) A water cistern with a volume in cubic metres of 60% of the total roof area (in square metres) of the building(s) shall be constructed to store rain water run-off from the built up area of the development. This cistern shall be completed and available for use prior to the development hereby being first brought into use.

j) Where applicable, the ramp leading down to the underlying basement/garages for private car parking shall at no point be steeper than 1:5 from the back edge of the pavement. If there are more than 5 public car parking spaces or garages, the ramp shall not be steeper than 1:8 (or 1:10 if helical). The ramp shall always be so formed that it does not encroach onto the pavement.

k) Where applicable, an area of a depth of 4 metres from the pavement, with a gradient not steeper than 1:10, shall be provided within the site for vehicles to wait at pavement level before entering the street.

l) The height of the development shall not exceed the permitted number of floors and the height in metres as indicated on the approved drawings.

m) No steps, ramps or street furniture are to be constructed on or encroached onto the public pavement or road.

n) Any doors and windows, the lower edge of which is less than 2m above road level, and any gates shall not open outwards onto a public pavement or road.

o) Where present, window grilles (including 'pregnant' windows), sills, planters and other similar elements which are part of or fixed to the facade of buildings, the lower edge of which is less than 2 metres above road level, shall not project more than 0.15 metres from the facade over a public pavement or street.

p) Air conditioning units shall not be located on the facades of the building which are visible from a public space/street.

q) There shall be no service pipes, cables or wires visible on the front elevation or on any other elevations of the building which are visible from the street or public space.

The execution and validity of this permission is **suspended** and no works as approved by the said development permission may commence before the lapse of the time period established in Article 41(2) of the Act. It shall remain so suspended until the Environment and Planning Review Tribunal appoints its first hearing in terms of Article 41(4) if, together with an appeal lodged against such permit, a request for a suspension of permit is also requested in terms of Article 41(3).

Where the approved drawings and/or documents are dimensioned, then the declared dimensions shall prevail over the actual size as depicted on the approved drawings and/or documents.

Developers are advised to check the invert level to the sewer main with the Water Services Corporation as they would have to make their own arrangements where a gravity service connection is not possible. In these cases, the architect has to indicate the solutions envisaged and to indicate on the plan what needs to be carried out and obtain approval from WSC. Developers are further reminded that connection of storm water into main sewers is not allowed.

If the declaration of ownership, as contained in the application form, is determined as incorrect by a Court of Law, then the said Court of Law can declare this development permission as null and void. This development permission does not remove or replace the need to obtain the consent of the land/building owner to this development before it is carried out. Furthermore, it does not imply that consent will necessarily be forthcoming nor does it bind the land/building owner to agree to this development. Where the land/building is owned or administered by the Government of Malta a specific clearance and agreement must be obtained for this development from the Land and/or Estate Management Departments.

This development permission is granted saving third party rights. This permission does not exonerate the applicant from obtaining any other necessary permission, license, clearance or approval required from any Government department, local council, agency or authority (including MEPA), as required by any law or regulation.

This development permit does not authorise any storage of substances listed in Occupational Health and Safety Authority Act (Cap. 424) - Control of Major Accident Hazards Regulations, 2003, as amended, in quantities that would render this site an establishment within scope of these regulations. The storage and handling of said substances may require a new or amended development permission in line with current policies and regulations.

For any non-residential uses hereby being approved, prior to commencement of any works on site or any eventual permitted change of use, the applicant shall be required to contact the Environment Protection Directorate (within MEPA) to obtain any necessary operational permit or registration. This requirement does not apply to Class 4, 5, 7 and 8 uses as listed in the Development Planning (Use Classes) Order (1994), or its subsequent amendments.

This decision is being published on 19 April 2014.

Joseph Borg
Board Secretary
MEPA

Notes to Applicant and Perit

Right for reconsideration

Where applicable, you have a right to submit a request for reconsideration to the Authority in terms of regulation 10 of Legal Notice 514 of 2010.

Right for appeal

You have a right to submit an appeal, against the decision, to the Environment and Planning Review Tribunal in terms of article 41 and the Second Schedule of the Environment and Development Planning Act, 2010.

Time limits

Requests for reconsideration or appeals must be made within 30 days from the publication of the decision notification in the local press as required by regulation 6(6) of Legal Notice 514 of 2010.

Fees to submit a request for reconsideration or appeal

In either case, there is a fee to be paid which should accompany the request for reconsideration or the appeal. The fees are as follows:

For reconsideration - 3% of the Development Permit Fee paid in respect of the original application, subject to a minimum of €69.88.

For appeal - 5% of the Development Permit Fee paid in respect of the original application, subject to a minimum of €186.35.

Submission of request for reconsideration or appeal

With regards to requests for reconsideration, Form MEPA 6/10 must be used for submission. All fields of the Form must be filled in as appropriate. Requests for reconsideration can only be submitted electronically.

With regards to appeals, as required by the Second Schedule of the Act, the submission must include the detailed grounds for appeal and the requests being made by the appellant. Appeals must be submitted physically at the offices of the Environment and Planning Review Tribunal, St. Francis Ditch, Floriana.

Submission of an appeal — General Services Board

If this application has been refused on sanitary issues, an appeal to the General Services Board may be submitted within one month from publication of Decision Notification on the press.

Location: Site at Don Kotra, Sqaq Fdal Il- Hadid, Luqa, Malta
Proposal: Amendments to approved PA 5538/07 to include composter shed and equipment.

Environment and Development Planning Act, 2010 Full Development Permission

The Malta Environment & Planning Authority hereby grants development permission in accordance with the application and documents described above, subject to the following conditions:

- 1 Any conditions or part of conditions imposed in the previous permit PA 5538/07, which are not being superseded by any condition in this development permission shall remain valid.
- 2
 - a. Prior to the issue of the development permit applicant to submit a hard copy of the application for a variation of the Environmental Permit WM 0006/09/I to EPD satisfaction.
 - b. All operations concerning the management of waste are subject to the legal provisions of Legal Notice 184 of 2011 [Waste Regulations of 2011] and Legal Notice 106 of 2007 [Waste Management (Activity Registration) Regulations, 2007].
 - c. All wastes generated during construction and demolition shall be separated according to the different waste streams as per EWC codes and disposed of in sites permitted by MEPA to accept such waste.
 - d. Inert waste material resulting from excavations or from demolition may be reused as fill material on site or shall be deposited at facilities permitted by MEPA and in accordance with the legal provisions of Legal Notice 184 of 2011 [Waste Regulations of 2011] and Legal Notice 106 of 2007 [Waste Management (Activity Registration) Regulations, 2007].

e. Any soil on the site shall not be built over but shall be collected for reuse. A permit from the Director of Agriculture is required to remove the soil from the site and to transport it to a different location. This condition does not exonerate the applicant, contractor or any other relevant party from complying with all permitting requirements as may be applicable for deposition of the removed soil onto other land. Soil and material removed from the site shall not be deposited on any open or undeveloped land outside officially approved development zones, nor used for land reclamation, unless with prior approval in writing by the Environment Protection Directorate.

f. Prior to the commencement of operations, applicant is to submit an application for EOWC (end of waste criteria) with the Environment Protection Directorate. Following the EOW criteria tests must be carried out as stipulated in the same EOWC in order to determine whether the stipulated standards have been met or not.

g. Within 6 months from the issue of the permit, the Veterinary Department is to be consulted since ABPR (Animal by Product Regulations) fall under its remit.

h. Should the applicant be placing packaging material on the Maltese market for the first time, then the applicant would need to comply with the provisions of the Waste Management (Packaging and Packaging Waste) Regulations.

- 3
- a) This development permission is valid for a period of FIVE YEARS from the date of publication of the decision in the press but will cease to be valid if the development is not completed by the end of this validity period.
- b) This permission relates only to the development as specifically indicated on the approved drawings. This permission does not sanction any other illegal development that may exist on the site.
- c) Copies of all approved drawings and documents shall be available for inspection on site by MEPA staff at all reasonable times. All works shall be carried out strictly in accordance with the approved drawings, documents and conditions of this permission. Where a matter is not specified, then the conditions of this permission and of Development Control Policy and Design Guidance shall take precedence and shall modify the drawings and documents accordingly.
- d) Where applicable, all building works shall be erected in accordance with the official alignment and official/existing finished road levels as set out on site by MEPA's Land Surveyor. The Setting Out Request Notice must be submitted to the Land Survey Unit of MEPA when the setting out of the alignment and levels is required.
- e) Where an officially schemed street, within the development zone, bordering the site is unopened or unformed, it shall be opened up and brought up to its proper, approved and official formation levels prior to the commencement of any development hereby being permitted.
- f) Before any part of the development hereby permitted commences, the enclosed green copy of this development permission shall be displayed on the site. This must be mounted on a notice board, suitably protected from the weather and located not more than 2 metres above ground level at a point on the site boundary where it is clearly visible and can be easily read from the street. The copy of the permission must be maintained in a good condition and it shall remain displayed on the site until the works are complete.

g) A Commencement Notice is to be submitted to MEPA at least FIVE DAYS prior to the date of commencement of the development hereby approved. Failure to serve the Commencement Notice or to serve it within the required timeframe shall result in the imposition of fines according to Schedule D of Legal Notice 277 of 2012, or its amendments, or its replacements.

h) Where applicable, the development hereby permitted shall be carried out in accordance with the provisions of the Environmental Management Construction Site Regulations, Legal Notice 295 of 2007 (or subsequent amendments). Any hoarding shall be erected in accordance with Schedule 2 of the same Regulations.

i) Where applicable, all new developments shall be provided with a water cistern to store rainwater run-off as required by the Energy Performance of Buildings Regulations (2012) [published through Legal Notice 376 of 2012 and any amendments thereto].

j) All new developments shall conform to the Technical Guidance: Conservation of Fuel, Energy and Natural Resources - Document F [published through Government Notice 1002 of 2006 and any amendments thereto which are prevailing at the time of construction of the development].

k) Where applicable, the ramp leading down to the underlying basement/garages for private car parking shall at no point be steeper than 1:5 from the back edge of the pavement. If there are more than 5 public car parking spaces or garages, the ramp shall not be steeper than 1:8 (or 1:10 if helical). The ramp shall always be so formed that it does not encroach onto the pavement.

l) Where applicable, an area of a depth of 4 metres from the pavement, with a gradient not steeper than 1:10, shall be provided within the site for vehicles to wait at pavement level before entering the street.

m) Where applicable, any garages/parking spaces shall only be used for the parking of private cars and they shall be kept available at all times for this purpose.

n) Where applicable, any approved stores shall be used for domestic storage only and shall be physically and internally linked to the overlying dwellings.

o) The height of the development shall not exceed the permitted number of floors and the height in metres as indicated on the approved drawings.

p) No steps, ramps or street furniture are to be constructed on or encroached onto the public pavement or road.

q) Any doors and windows, the lower edge of which is less than 2m above road level, and any gates shall not open outwards onto a public pavement or road.

r) Where applicable, the garage door opening(s) at ground floor level, overlooking the public street, shall be fitted with a solid aperture within the thickness of the external wall along the building alignment. This aperture shall be of the same colour of the other apertures on the elevation, unless otherwise indicated on the approved drawings. This aperture shall be fitted prior to the issue of any Compliance Certificate (partial or full) on the whole or any part of the development hereby approved. No gates are permitted on this opening.

s) Where present, window grilles (including 'pregnant' windows), sills, planters and other

similar elements which are part of or fixed to the facade of buildings, the lower edge of which is less than 2 metres above road level, shall not project more than 0.15 metres from the facade over a public pavement or street.

t) Air conditioning units shall not be located on the facades of the building which are visible from a public space/street.

u) There shall be no service pipes, cables or wires visible on the front elevation or on any other elevations of the building which are visible from the street or public space.

- 4
- a) The structures covered by this development permission shall only be used for their approved purpose. This development permission does not imply that any buildings or structures hereby being permitted may eventually be allowed to be put to any other use. In the case that the structures are not used for a period of three consecutive years within thirty years from the date of issue of this permit, and/or is not used for its permitted purpose, these shall be demolished at the expense of the owner and the site is reverted back to the original state as decided by MEPA, within a specific time period as stipulated by the Authority.
- b) The whole exterior of buildings, including all roof structures and all elevations, shall be constructed/retained in local recycled stone, except where other materials, finishes or colours are specified on the approved drawings or documents. Where in local stone, the stone shall remain unrendered and unpainted, and it shall be allowed to weather naturally. Exteriors indicated to be rendered/finished other than in local stone, are to be painted in local stone colour, unless other colours are indicated on the approved drawings.
- c) Except where otherwise specified on the approved drawings, all external apertures, closed balconies and gates shall be constructed in timber. Open balcony railings and all other metalwork shall be in wrought iron. No apertures or railings shall be constructed of gold, silver or bronze aluminium.
- d) Where applicable, any balconies shall be located so that their side outer face is at least 0.75 metres away from the outer face of the party wall nearest to the balconies. The balconies shall not project more than 0.75 metres from the facade of the building. Any closed balconies shall not project more than 0.6 metres from the facade of the building.
- e) No services are to be located on the roof of the building, unless such services are specifically indicated on the approved drawings. Where approved, all services are to be clustered together and surrounded by a 1.5 metres high solid unrendered masonry wall. The services shall not exceed the height of this screen which shall be setback at least 2 metres from all the edges of the level on which the services are located.
- f) Existing random rubble walls shall be retained and maintained in accordance with the Rubble Walls and Rural Structures (Conservation and Maintenance) Regulations (Legal Notice 160/97 as amended by Legal Notice 169/04). Unless specified otherwise, this development permission does not entail the demolition and/or carrying out of significant alterations of any random rubble boundary walls or any non-habitable rural structures.
- g) In case alterations to existing random rubble walls are being approved, these shall be carried out in a traditional manner (loose, unhewn random rubble stones which stand by gravity and friction without the use of mortar). Unless specified on the approved drawings, the height of any boundary wall shall not exceed 1.2 metres along its whole length, provided that where there is a difference between the levels on either side of the

wall, the overall height of the wall shall not exceed 2.4 metres from the lower level and 1.2 metres from the higher level, at any point along its length.

h) New boundary walls are to be constructed in random-sized irregularly shaped rough dressed stones using the same traditional construction methodology of rubble walling. Unless specified on the approved drawings, the height of any new boundary wall shall not exceed 0.6 metres along its whole length from the existing site levels.

i) Where applicable, landscaping of the site shall be implemented in its entirety within the first planting season following completion of the development hereby approved, in accordance with the details submitted with the application unless the prior approval in writing of MEPA has been obtained to depart from these details. No compliance certificate (partial or full) shall be issued on part, or the whole, of the development hereby approved prior to the implementation of the landscaping scheme in its entirety.

j) Concrete flooring, paving and other hard surfacing shall be limited to the areas where such flooring, paving or surfacing is clearly shown on the approved drawings. All other unbuilt areas are to be left unsurfaced and covered in soil (unless otherwise specified in the approved drawings or in any other condition of the permission).

k) The development must not involve or require any new access routes (and/or modification of existing access routes) beyond the land area approved for development.

l) Where trenching is required, works covered by this permission shall be restricted to trenching (and cable laying) within the confines of the existing road carriageways as indicated on the approved drawings. The applicant shall also be responsible for ensuring that:

(i) operations do not cause or entail damage to any trees (including their roots), buildings, bridges, rubble walls (hitan tas-sejjegh), or exposed rock, or to any land, property, habitats or features beyond such road carriageways;

(ii) all material, structures, vehicles and machinery used for, or generated by, the works are entirely confined to the land area occupied by the existing road carriageways, and no overflows or trampling beyond such land area are allowed to occur;

(iii) all the land surface affected by trenching operations is immediately reinstated to its pristine condition once the works have been completed;

(iv) no overhead wiring is installed; and

(v) in the case of trenching for electricity cables, the development shall also include the removal of all existing overhead wiring and ancillary poles/masts throughout the site.

m) The development is not to be a source of light pollution, especially at night. To this effect:

(i) lighting should be strictly limited to within the developed part of the site;

(ii) the development hereby being permitted should not be considered as a justification for the lighting of the access roads, tracks and paths leading to the site or other lighting beyond the site boundary;

(iii) the lighting has to be from any peripheral landscaping inward, so as to be screened as much as possible by the landscaping itself; and

(iv) all exterior lighting installed on site is to be of the downward-pointing, full cut-off type. No luminaire globes or uplighters are accepted.

- 5 a) The approved premises shall be used as indicated on the approved drawings or as limited by any condition of this permission. If a change of use is permitted through the Development Planning (Use Classes) Order, 2014 (or its subsequent amendments), and it

is not restricted by a condition of this permission, approval from the National Commission for Persons with Disability may still be required. Reference needs to be made to MEPA Circular 3/10 (with the exception of Appendix A), MEPA Circular 2/14 and their subsequent amendments.

b) Where provided, loading and unloading shall take place solely within the premises, and not from/on the public pavement or street.

c) Unless shown on the approved drawings, no approval is hereby granted for the display of any sign or advertisement. These must form the subject of a separate application for advertisement consent.

d) No activity is to take place outside the premises, unless clearly indicated on the approved drawings, and no crates or other items are to be stored outside. The placing/installation of any structures or facilities in front of the premises, unless indicated on the approved drawings, must be the subject of a separate clearance/permission from MEPA.

6 The development hereby permitted shall be subject to Final Compliance (Completion) Certification, verifying that the development has been carried out in full accordance with the approved drawings, documents and conditions imposed in this development permission. Prior to the issuing of the Final Compliance Certificate for this development, the applicant shall submit to MEPA:

(i) certification from a qualified engineer confirming that the development fully satisfies the requirements specified in report PA 1876/15/27A;

(ii) certification from a qualified engineer confirming that the flood-lighting is in line with the requirements of condition number 3 of this development permission.

7 The conditions imposed and enforced by the Superintendence of Cultural Heritage are at document PA 1876/15/72A. The architect/applicant is required to contact the Superintendence of Cultural Heritage, throughout all the construction phases of the development hereby approved, to ensure that the development is carried out in conformity with the conditions imposed by the Superintendence of Cultural Heritage.

8 The conditions imposed and enforced by the Civil Protection Department are at document PA 1876/15/68. The architect/applicant is required to contact the Department, throughout all the construction phases of the development hereby approved, to ensure that the development is carried out in conformity with the conditions imposed by the Civil Protection Department.

10 The conditions imposed and enforced by the Environmental Health Directorate are at document PA 1876/15/67A. The architect/applicant is required to contact the Environmental Health Directorate, throughout all the construction phases of the development hereby approved, to ensure that the development is carried out in conformity with the conditions imposed by the Environmental Health Directorate.

The execution and validity of this permission is **suspended** and no works as approved by the said

development permission may commence before the lapse of the time period established in Article 41(2) of the Act. It shall remain so suspended until the Environment and Planning Review Tribunal appoints its first hearing in terms of Article 41(4) if, together with an appeal lodged against such permit, a request for a suspension of permit is also requested in terms of Article 41(3).

Where the approved drawings and/or documents are dimensioned, then the declared dimensions shall prevail over the actual size as depicted on the approved drawings and/or documents.

Developers are advised to check the invert level to the sewer main with the Water Services Corporation as they would have to make their own arrangements where a gravity service connection is not possible. In these cases, the architect has to indicate the solutions envisaged and to indicate on the plan what needs to be carried out and obtain approval from WSC. Developers are further reminded that connection of storm water into main sewers is not allowed.

If the declaration of ownership, as contained in the application form, is determined as incorrect by a Court of Law, then the said Court of Law can declare this development permission as null and void. This development permission does not remove or replace the need to obtain the consent of the land/building owner to this development before it is carried out. Furthermore, it does not imply that consent will necessarily be forthcoming nor does it bind the land/building owner to agree to this development. Where the land/building is owned or administered by the Government of Malta a specific clearance and agreement must be obtained for this development from the Land and/or Estate Management Departments.

This development permission is granted saving third party rights. This permission does not exonerate the applicant from obtaining any other necessary permission, license, clearance or approval required from any Government department, local council, agency or authority (including MEPA), as required by any law or regulation.

This development permit does not authorise any storage of substances listed in Occupational Health and Safety Authority Act (Cap. 424) - Control of Major Accident Hazards Regulations, 2003, as amended, in quantities that would render this site an establishment within scope of these regulations. The storage and handling of said substances may require a new or amended development permission in line with current policies and regulations.

For any non-residential uses hereby being approved, prior to commencement of any works on site or any eventual permitted change of use, the applicant shall be required to contact the Environment Protection Directorate (within MEPA) to obtain any necessary operational permit or registration. This requirement does not apply to Class 2B, 2C, 4A and 4B uses as listed in the Development Planning (Use Classes) Order 2014, or its subsequent amendments.

This decision is being published on 30 December 2015.

Joseph Borg
Board Secretary
MEPA

Notes to Applicant and Perit

Right for reconsideration

Where applicable, you have a right to submit a request for reconsideration to the Authority in terms of regulation 10 of Legal Notice 514 of 2010.

Right for appeal

You have a right to submit an appeal, against the decision, to the Environment and Planning Review Tribunal in terms of article 41 and the Second Schedule of the Environment and Development Planning Act, 2010.

Time limits

Requests for reconsideration or appeals must be made within 30 days from the publication of the decision notification in the local press as required by regulation 6(6) of Legal Notice 514 of 2010.

Fees to submit a request for reconsideration or appeal

In either case, there is a fee to be paid which should accompany the request for reconsideration or the appeal. The fees are as follows:

For reconsideration - 3% of the Development Permit Fee paid in respect of the original application, subject to a minimum of €69.88.

For appeal - 5% of the Development Permit Fee paid in respect of the original application, subject to a minimum of €186.35.

Submission of request for reconsideration or appeal

With regards to requests for reconsideration, Form MEPA 6/10 must be used for submission. All fields of the Form must be filled in as appropriate. Requests for reconsideration can only be submitted electronically.

With regards to appeals, as required by the Second Schedule of the Act, the submission must include the detailed grounds for appeal and the requests being made by the appellant. Appeals must be submitted physically at the offices of the Environment and Planning Review Tribunal, St. Francis Ditch, Floriana.

Submission of an appeal — General Services Board

If this application has been refused on sanitary issues, an appeal to the General Services Board may be submitted within one month from publication of Decision Notification on the press.

Transport Malta : PA 4172/16/92J

Location: Site at Don Kotra, Sqaq Fdal II- Hadid, Luqa, Malta
Proposal: Proposed amendments from approved permits PA 5538/07 & PA 1876/15; to amend site boundary, site area to remain as approved; proposed erection of e.l.v. shed, additional access from private road, demolition of part of existing building and reconfiguration of site internal layout as indicated on drawings.

Development Planning Act, 2016 Full Development Permission

The Planning Authority hereby grants development permission in accordance with the application and documents described above, subject to the following conditions:

- 1 Any conditions or part of conditions imposed in previous permits PA 5538/07 and PA 1876/15, which are not being superseded by any condition in this development permission, shall remain valid.

- 2 The bank guarantee to the value of Euro 3,000 imposed in condition 1 of permit PA 05538/07 shall be extended to cover this development permission. The bank guarantee shall cover any failure to implement the landscaping scheme or to maintain the landscaping to the satisfaction of the Planning Authority. This bank guarantee shall be managed as follows:
 - i) the bank guarantee shall be reduced by €500 (Five Hundred Euro) to a balance of €2,500 (Two Thousand Five Hundred Euro) on planting of the whole landscaping scheme and effective irrigation. Planting shall be carried out within the first planting season following completion of the development hereby approved, failing which the

bank guarantee shall be forfeited.

- ii) the bank guarantee shall be reduced by a further €1000 (One Thousand Euro) to a balance of €1,500 (One Thousand Five Hundred Euro) after two years of planting and subject to effective maintenance of landscaping. Any trees that die or become severely diseased shall be replaced with the equivalent or greater number of trees of the same species and age as soon as planting is possible.
- iii) the remaining balance of €1,500 (One Thousand Five Hundred Euro) will expire after five years from planting, subject to maintenance of landscaping. Any trees that die or become severely diseased shall be replaced with the equivalent or greater number of trees of the same species and age as soon as planting is possible.

In the event that the applicant fails to implement the scheme within the stipulated time limit, or fails to properly maintain the landscaping, the outstanding bank guarantee shall be immediately forfeited. Its forfeiture would not, however, preclude the Authority from taking any action to ensure that the conditions of this permission are adhered to and the approved drawings/documents are complied with.

- 3 Landscaping of the site shall be implemented in its entirety within the first planting season following completion of the development hereby approved, in accordance with the approved plans, unless the prior Planning Authority approval in writing has been obtained to depart from these details.

No compliance certificate (partial or full) shall be issued on part, or the whole, of the development hereby approved prior to the implementation of the landscaping scheme in its entirety.

- 4 The development hereby permitted shall be subject to Final Compliance (Completion) Certification, verifying that the development has been carried out in full accordance with the approved drawings, documents and conditions imposed in this development permission, except where such conditions are enforced by other entities. Prior to the issue of any compliance certificate on any part of this development, the applicant shall submit to Planning Authority, in relation to that part of the building:

(i) Certification from a qualified engineer confirming that the development fully satisfies the requirements specified in supporting document PA 04172/16/81A/92E.

(ii) Certification from a qualified engineer confirming that the external lighting is in line with the requirements of approved drawing PA 04172/16/92C and supporting document PA 04172/16/92E.

- 5 The conditions imposed and enforced by the Environment and Resources Authority (ERA) are at supporting document PA 4172/16/50A. The architect/applicant is required to contact the Environment and Resources Authority, throughout the implementation of the development hereby approved, to ensure conformity with the imposed conditions. A copy of the relative correspondence issued by the Environment and Resources Authority shall be submitted to the Planning Authority accordingly.

- 6 The conditions imposed and enforced by the Superintendence of Cultural Heritage are at supporting document PA 4172/16/76A/76B. The architect/applicant is required to contact the Superintendence of Cultural Heritage, throughout the implementation of the development hereby approved, to ensure conformity with the imposed conditions. A copy of the relative correspondence issued by the Superintendence of Cultural Heritage shall be submitted to the Planning Authority accordingly.
- 7 The conditions imposed and enforced by Transport Malta are at supporting document PA 4172/16/92J. The architect/applicant is required to contact Transport Malta, throughout the implementation of the development hereby approved, to ensure conformity with the imposed conditions. A copy of the relative correspondence issued by Transport Malta shall be submitted to the Planning Authority accordingly.
- 8
- a) Unless located within an official category settlement, if the approved structures are not used for a period of three consecutive years within thirty years from the date of issue of this permit, and/or are not used for the permitted purpose, these shall be demolished at the expense of the owner and the site shall be reverted back to the original state within a specific time period as decided by Planning Authority.
 - b) The whole exterior of buildings, including all roof structures and all elevations, shall be constructed/ retained in local recycled stone, except where other materials, finishes or colours are specified on the approved drawings or documents. Where in local stone, the stone shall remain unrendered and unpainted, and allowed to weather naturally. Exteriors indicated to be rendered/finished other than in local stone, are to be painted in local stone colour, unless other colours are indicated on the approved drawings.
 - c) Except where otherwise specified on the approved drawings, all external apertures, closed balconies and gates shall be constructed in timber or timber-like finish. Open balcony railings and all other metalwork shall be in wrought iron. No apertures or railings shall be constructed of gold, silver or bronze aluminium.
 - d) No services are to be located on the roof of the building.
 - e) Existing random rubble walls shall be retained and maintained in accordance with the Rubble Walls and Rural Structures (Conservation and Maintenance) Regulations (Legal Notice 160/97 as amended by Legal Notice 169/04).
 - f) In case alterations to existing random rubble walls are being approved, these shall be carried out in a traditional manner (loose, unhewn random rubble stones which stand by gravity and friction without the use of mortar). Unless specified on the approved drawings, the height of any boundary wall shall not exceed 1.2 metres along its whole length, provided that where there is a difference between the levels on either side of the wall, the overall height of the wall shall not exceed 2.4 metres from the lower level and 1.2 metres from the higher level, at any point along its length.
 - g) New boundary walls are to be constructed in random-sized irregularly shaped rough dressed stones using the same traditional construction methodology of rubble walling. Unless specified on the approved drawings, the height of any new boundary wall shall not

exceed 0.6 metres along its whole length from the existing site levels.

h) The development does not grant consent for any new access routes (and/or modification of existing access routes) beyond the land area approved for development.

i) Where trenching is required, works covered by this permission shall be restricted to trenching (and cable laying) within the confines of the existing road carriageways as indicated on the approved drawings. The applicant shall also be responsible for ensuring that:

- (i) operations do not cause or entail damage to any trees (including their roots), buildings, bridges, rubble walls (hitan tas-sejjieh), or exposed rock, or to any land, property, habitats or features beyond such road carriageways;
- (ii) all material, structures, vehicles and machinery used for, or generated by, the works are entirely confined to the land area occupied by the existing road carriageways, and no overflows or trampling beyond such land area are allowed to occur;
- (iii) all the land surface affected by trenching operations is immediately reinstated to its pristine condition once the works have been completed;
- (iv) no overhead wiring is installed; and
- (v) in the case of trenching for electricity cables, the development shall also include the removal of all existing overhead wiring and ancillary poles/masts throughout the site.

j) The development is not to be a source of light pollution, especially at night. To this effect:

- (i) lighting should be strictly limited to within the developed part of the site;
- (ii) the development hereby being permitted should not be considered as a justification for the lighting of the access roads, tracks and paths leading to the site or other lighting beyond the site boundary;
- (iii) the lighting has to be from any peripheral landscaping inward, so as to be screened as much as possible by the landscaping itself; and
- (iv) all exterior lighting installed on site is to be of the downward-pointing, full cut-off type. No luminaire globes or uplighters are accepted.

k) This permission does not grant consent for the erection of distribution poles and overhead lines. No new distribution poles or overhanging electricity cables are to be erected to supply electricity to the building hereby approved. The electrical connection of the building hereby approved to the nearest electricity source shall be provided through adequate underground ducts, installed at the applicant's expense, to the satisfaction of Planning Authority. This applies to other services to be installed that would require the erection of poles or other supports. Unless indicated on the approved drawings of this permission, a separate application/notification needs to be submitted to obtain the necessary approval.

- 9 Loading and unloading shall take place solely within the premises, and not from/on the public pavement or street.
- 10
- a) This development permission is valid for a period of FIVE YEARS from the date of publication of the decision in the press but will cease to be valid if the development is not completed by the end of this validity period.
 - b) This permission relates only to the development as specifically indicated on the approved drawings. This permission does not sanction any other illegal development that may exist on the site.
 - c) Copies of all approved drawings and documents shall be available for inspection on site by Planning Authority officers at all reasonable times.
 - d) The development shall be carried out in complete accordance with the approved drawings, documents and conditions of this permission. Where a matter is not specified, then the conditions of this permission and of Development Control Design Policy, Guidance and Standards 2015 shall apply.
 - e) Before any part of the development hereby permitted commences, the enclosed green copy of this development permission shall be displayed on the site. This must be mounted on a notice board, suitably protected from the weather and located not more than 2 metres above ground level at a point on the site boundary where it is clearly visible and can be easily read from the street. The copy of the permission must be maintained in a good condition and it shall remain displayed on the site until the works are completed.
 - f) A Commencement Notice is to be submitted to the Planning Authority, by the permit holder on behalf of the applicant, at least FIVE DAYS prior to the date of commencement of works or utilisation of the permission. Failure to submit the Commencement Notice (with all fields correctly completed) or failure to submit it within the required timeframe shall invalidate the Notice and shall result in the imposition of fines according to Schedule D of Legal Notice 277 of 2012, or its amendments, or its replacements. In addition, **if the applicant fails to submit the Commencement Notice or the Commencement Notice submitted is invalid, the relative permission shall be considered as never having been utilised** - Article 72(4) of the Development Planning Act (2016).
 - g) All building works shall be erected in accordance with the official alignment and official/existing finished road levels as set out on site by the Planning Authority's Land Surveyor. The Setting Out Request Notice must be submitted to the Land Survey Unit of the Planning Authority when the setting out of the alignment and levels is required.
 - h) Where an officially schemed street, within the development zone, bordering the site is unopened or unformed, it shall be opened up and brought up to its proper, approved and official formation levels prior to the commencement of any development hereby being permitted.
 - i) It is the responsibility of the permit holder to ensure that development is carried out in accordance with the provisions of the Environmental Management Construction Site Regulations, Legal Notice 295 of 2007 (or subsequent amendments). Any hoarding shall be erected in accordance with Schedule 2 of the same Regulations.
 - j) New development on vacant or redeveloped sites shall be provided with a water cistern

to store rainwater run-off as required by the Energy Performance of Buildings Regulations (2012) [published through Legal Notice 376 of 2012 and any amendments thereto].

k) No steps, ramps or street furniture are to be constructed on or encroached onto the public pavement or road.

l) Any doors and windows, the lower edge of which is less than 2m above road level, and any gates shall not open outwards onto a public pavement or road.

m) Where present, window grilles (including 'pregnant' windows), sills, planters and other similar elements which are part of or fixed to the facade of buildings, the lower edge of which is less than 2 metres above road level, shall not project more than 0.15 metres from the facade over a public pavement or street.

n) Air conditioning units shall not be located on the facades of the building which are visible from the street or a public space.

o) There shall be no service pipes, cables or wires visible on the front elevation or on any other elevations of the building which are visible from the street or public space.

11

Conditions imposed and enforced by other entities

A. Where construction activity is involved:

(a) the applicant shall:

(i) Appoint a Project Supervisor for the Design Stage and a Project Supervisor for the Construction Stage and any such appointment shall be terminated, changed or renewed as necessary. The same person may be appointed to act as project supervisor for both the design and construction stage, if that person is competent to undertake the duties involved and

(ii) Keep a health and safety file prepared by the Project Supervisor for the Design Stage.

(b) When the construction works related to this application are scheduled to last longer than thirty working days and on which more than twenty workers are occupied simultaneously, or on which the volume of work is scheduled to exceed five hundred person-days, the project supervisor **shall communicate a prior notice to the Occupational Health and Safety Authority (OHSA) at least four calendar weeks before commencement of works.**

(c) The Project Supervisor for the Design Stage shall **draw up a health and safety plan** which sets out the occupational health and safety rules applicable to the construction activities concerned, outlining the measures to ensure cooperation between different contractors and shall also include specific measures concerning occupational risks that may be present at this site.

B. Where the development concerns a change of use to a place of work, the applicant shall obtain a Perit's declaration that the building conforms to the requirements of LN 44 of 2002.

C. Where the development concerns a place of work:

The applicant shall:

- (i) obtain a Perit's declaration that the necessary requirements arising out of LN 44 of 2002 have been included in the plans and drawings; and
- (ii) obtain a Perit's declaration that the building conforms to the requirements of LN 44 of 2002.

D. The development is to strictly adhere to the 'Design Guidelines on fire safety for buildings in Malta' to ensure that all Fire Safety measures and provisions are addressed as indicated in the Design Guidelines on Fire Safety for Buildings in Malta, published by the DCID in 2004, (or other relevant standard, provided it is approved by the Civil Protection Department), Policies, and the Laws and Regulations of Malta.

E. Prior to laying of water and wastewater services in the road, the development shall comply with the requirements of Legal Notice 29/10 Part III (Roads in inhabited Areas) Clause 12.

F. In the event of an accidental discovery in the course of approved works, any cultural heritage feature discovered should not be damaged or disturbed and the Superintendence is to be immediately informed of such discovery. Any cultural heritage features discovered are to be investigated, evaluated and protected in line with the Cultural Heritage Act 2002 (CAP 445). The discovery of cultural heritage features may require the amendment of approved plans.

In terms of Article 72(3) of the Development Planning Act, 2016, the execution and validity of this permission is automatically temporarily **suspended** and no works as approved by the said development permission may commence before the lapse of the time period established in Article 13 of the Environment and Planning Review Tribunal Act and subsequently will remain so suspended if the Tribunal so decides in accordance with the Environment and Planning Review Tribunal Act.

Where the approved drawings and/or documents are dimensioned, then the declared dimensions shall prevail over the actual size as depicted on the approved drawings and/or documents.

Developers are advised to check the invert level to the sewer main with the Water Services Corporation as they would have to make their own arrangements where a gravity service connection is not possible. In these cases, the architect has to indicate the solutions envisaged and to indicate on the plan what needs to be carried out and obtain approval from WSC. Developers are further reminded that connection of storm water into main sewers is not allowed.

If the declaration of ownership, as contained in the application form, is determined as incorrect by a Court of Law, then the said Court of Law can declare this development permission as null and void. This development permission does not remove or replace the need to obtain the consent of the land/building owner to this development before it is carried out. Furthermore, it does not imply that consent will necessarily be forthcoming nor does it bind the land/building owner to agree to this development. Where the land/building is owned or administered by the Government of Malta a specific clearance and agreement must be obtained for this development from the Land and/or Estate Management Departments.

This development permission is granted saving third party rights. This permission does not exonerate the applicant from obtaining any other necessary permission, license, clearance or approval required from any Government department, local council, agency or authority, as required by any law or regulation.

This development permit does not authorise any storage of substances listed in Occupational Health and Safety Authority Act (Cap. 424) - Control of Major Accident Hazards Regulations, 2003, as amended, in quantities that would render this site an establishment within scope of these regulations. The storage and handling of said substances may require a new or amended development permission in line with current policies and regulations.

For any non-residential uses hereby being approved, prior to commencement of any works on site or any eventual permitted change of use, the applicant shall be required to contact the Environment and Resources Authority to obtain any necessary operational permit or registration. This requirement does not apply to Class 2B, 2C, 4A and 4B uses as listed in the Development Planning (Use Classes) Order 2014, or its subsequent amendments.

This decision is being published on 28 November 2018.

Marthese Debono
Secretary Planning Commission (Development Permissions)

Notes to Applicant and Perit

Right for reconsideration

Where applicable, you have a right to submit a request for reconsideration to the Authority in terms of regulation 14 of Legal Notice 162 of 2016.

Right for appeal

You have a right to submit an appeal, against the decision, to the Environment and Planning Review Tribunal in terms of Article 13 of the Environment and Planning Review Tribunal Act, 2016.

Time limits

Requests for reconsideration or appeals must be made within 30 days from the publication of the decision notification in the local press as required by regulation 14(1) of Legal Notice 162 of 2016.

Fees to submit a request for reconsideration or appeal

In either case, there is a fee to be paid which should accompany the request for reconsideration or the appeal. The fees are as follows:

For reconsideration - 3% of the Development Permit Fee paid in respect of the original application, subject to a minimum of €69.88.

For appeal - 5% of DPF (Development Permit Fee) paid in respect of the original application, subject to a minimum of €150 + €50 administrative fee (LN 112 of 2016).

Submission of request for reconsideration or appeal

With regards to requests for reconsideration, Form PA 4/16 must be used for submission. All fields of the Form must be filled in as appropriate. Requests for reconsideration can only be submitted electronically.

With regards to appeals, as required by Article 13 of the Environment and Planning Review Tribunal Act, 2016, the submission must include the detailed grounds for appeal and the requests being made by the appellant. Appeals must be submitted physically at the offices of the Environment and Planning Review Tribunal, St. Francis Ditch, Floriana.

Important Notice

In view of the provisions of Article 72(4) of the Development Planning Act (2016), a Commencement Notice is to be submitted to the Planning Authority, by the perit on behalf of the applicant, at least FIVE DAYS prior to the date of commencement of works or utilisation of the permission. Failure to submit the Commencement Notice (with all fields correctly completed) or failure to submit it within the required timeframe shall invalidate the Notice and shall result in the imposition of fines according to Schedule D of Legal Notice 277 of 2012, or its amendments, or its replacements. In addition, if the applicant fails to submit the Commencement Notice or the Commencement Notice submitted is invalid, the relative permission shall be considered as never having been utilised.

Application for a Public Sewer Discharge Permit (based on L.N. 139 of 2002 Schedule D)

SECTION A

I DISMA ATTARD (Full Name), I.D. Card number 177575(M)
residing at SQAQ IL-FDAL TAL-HADID, LUQA, MALTA

telephone 2166 7857 fax / mobile 99493592
e-mail info@ddeattard.com
as representative of DDE ATTARD LTD

am applying for a permit to discharge effluent into the public sewer, during the one year period

from

DD	MM	YY
30	05	2017

 to

DD	MM	YY
30	05	2018

Address of premises from which effluent will be discharged:

SITE AT SQAQ IL-FDAL TAL-HADID, LUQA, MALTA.

The following is a brief outline of activities/processes envisaged to be carried out at the above premises during the above mentioned period:

SCRAPYARD, RECYCLING PLANT, ELV FACILITIES, COMPOSTING

The substances that will be used at the above premises (not necessarily discharged in the effluent) during the said period are:

Substances	Kg
<u>REFER TO ATTACHED</u>	

The proposed point of discharge is indicated in the attached site plan, scale 1:2500, which is signed by Architect and Civil Engineer

JOE BUGEJA
name in BLOCK LETTERS

Declaration by Applicant (tick appropriate box)

I declare that the effluent to be discharged from the above mentioned premises is exclusively domestic sewage i.e. effluent resulting exclusively from activities related to the habitation of humans, such as the use of toilets, wash hand basins, showers and kitchen facilities.

I declare that the effluent to be discharged from the above mentioned premises is trade effluent having the same characteristics as approved in Public Sewer Discharge Permit No _____ covering the period from

DD	MM	YY
----	----	----

 to

DD	MM	YY
----	----	----

(If one of the above options are chosen, you may proceed to SECTION E)

I declare that the effluent to be discharged from the above mentioned premises is, at least partly, trade effluent, as defined in the Environment Protection (Sewer Discharge Control) Regulations, 2002. For this reason, I am supplying the following information which, I understand, shall be treated as strictly confidential:

PA 4172/06 - In Process
 PA 1876/15 - Approved
 PA 5538/07 - Approved.
 IPPC Reference: IP 0001/13

SECTION B to be filled in for the discharge of trade effluent, please tick appropriate box/boxes

Type of industrial activity/process envisaged to take place in above premises during the year

Activity I – Manufacturing and Processing

Environmental Permit

Environment and Development Planning Act (CAP. 504; Act X of 2010)

Permit number
WM 0009/06/K

The Malta Environment and Planning Authority (hereinafter the Authority; the Competent Authority or MEPA) in exercise of its powers under the Environment and Development Planning Act (CAP. 504; Act X of 2010) and the Waste Regulations, 2011 (L.N. 184 of 2011 as amended), hereby authorises:

DDE Attard Ltd
Company registration number: **C 4938**

(hereinafter "the Operator" or "the Permit Holder"),
Of / Whose Registered Office (or principal place of business) is at:

DDE Attard Ltd
7, Scrap Lane
Valetta Road
Luqa, LQA 03, Malta

to carry out waste management activities related to storage and processing of specified non-hazardous waste at:

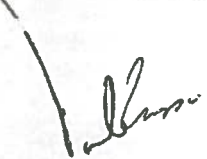

DDE Attard Ltd
3, Scrap Lane
Valetta Road
Luqa, LQA 03, Malta

to the extent authorised by and subject to the conditions of this Permit.

This permit is valid for **six (6) months** from the original issue date below. An application for renewal of this permit is to be submitted at least six weeks prior to expiry of this permit.

Appendix 5: Expenditure Plan

I. MEPA’s ToR in respect of expenditure are:

Please provide a plan of the estimated expenditure for each phase of the following specified activities.

The plan should include the likely costs of:

- *monitoring (emission/discharge and ambient monitoring);*
- *clearing the installation (including drainage systems) of all wastes;*
- *remedial action in the event of the failure of pollution control systems.*

We recognise that this plan may need to be revised before the issue of the final permit.

2. **Table I** provides an expenditure plan for various planned activities. Site remediation has not been costed since it would only be required if the site is found to have been contaminated at the decommissioning phase. That cost is also heavily dependent on the extent of remediation required and the technology chosen.

Table I: Expenditure plan

Activity	Estimated costs
Site reorganisation and upgrading	Confidential
Land monitoring	€12,000
Air monitoring	€5,000 (dependent on Terms of Reference, including number of samples)
Noise study	€1,500
Compost testing	€2,000
Clearing the installation of all wastes	€5,000
Cleaning the oil-water interceptor	€1,000
Collecting and disposing of an oily spill (around 2 m ²)	€1,000
Spill kits	€200
