

MEPA comments 30 May 2016 with EGM responses June 2016

Section 2.2.4

Annex I: Comparison of the processes at the Installation with the BREF for Large Combustion Plants (published July 2006).

Aspect of BAT	MEPA comment	EGM Responses June 2016
1. Part 1		2.
Combustion techniques for coal and lignite		
	Noted	
3. Part 2		4.
Combustion techniques for Biomass and Peat		
	Noted	
5. Part 3		6.
Combustion techniques for Liquid Fuels		
	Noted	
1. Part 4		2.
Combustion techniques for gaseous Fuels		
Supply and Handling of gaseous Fuels and additives	Noted. Noted. Kindly include details in main application document.	Section B2,3 has been updated accordingly.
Thermal Efficiency of gas fired combustion	Noted..	
Dust and SO₂ emissions from gas fired combustion plants	Noted. Further comments may ensue following updates to the Air dispersion model forming part of the EIA in relation to SO _x .	Noted
NO_x and CO emissions from gas fired combustion plants	Kindly refer to section B2.2.2 in the review document for additional comments and update the BAT conclusions accordingly. Noted.	The start up and shut down curves in section B2.2.2 have been updated in accordance with the comments in the review document. The BAT conclusions have been updated to include discussion on base load operations, fast start and shut down times and the start up and shut down curves in B2.2.2 referenced to.
Water Pollution	Noted.	
Combustion residues	Noted.	
BAT for	Noted	

combustion installations operated on offshore platforms
