

## EORC IPCC APPLICATION

### B 2.3

### WASTE MANAGEMENT

Location Code	Type of Waste	EWC Code	Quantity (max. site capacity)	Method of processing and/or disposal	Method of storage and containment
WM1	PAPER BAGS	15 01 01	ABT 400 BAGS	LICENSED CONTRACTOR	IN LARGE BINS
WM2	PLASTIC CANS	15 01 02	ABT 5000 CONT.	GREENPACK	IN MELTING/WASHING YARD
WM3	METAL DRUMS	15 01 04	ABT 1300 DRUMS	LICENSED CONTRACTOR	IN MELTING YARD
WM4	PET BAGS	15 01 02	ABT 1000/1100 BAGS	LICENSED CONTRACTOR	IN LARGE BINS
WM5	CONTAMINATED RAGS	15 02 02*	ABT 520 HAND RAGS P.A	LICENSED CONTRACTOR	IN LARGE BINS

#### OUR LICENSED CONTRACTORS:

WASTE CONTROL SERVICES LTD - PERMIT NO. GBR 00121/08 – *PICK UP ALL OUR WASTE EXCEPT DRUMS, GLYCERINE, JERRYCANS AND GREASE TRAPS. THEY DISPOSE OF WASTE AT GHALLIES LAND FILL.*

RAYMOND - PERMIT NO. GBR 00989/09 – *PICKS UP OUR METAL DRUMS AND TAKES THEM TO HOMPESH .*

MANGION - PERMIT NO. GBR 00637/09 – *CLEANS OUR GREASE TRAPS AND DISPOSES AT DISCHARGE POINT ZEJTUN.*

C&V POLYMERS LTD – PICKS UP OUR JERRYCANS AND THESE ARE RECYCLED.

During start-up, it is possible that there will be emission from boiler for about 20 minutes.

Wash waters from the process are separated from emulsions and soaps and put into waste streams/sewers. Non process wash water (floors/roads etc.) are treated with caustic soda so as convert the traces of oil into soap which are themselves used in the washing process and discharged to drains.
