

## **Environmental Policy – Għallis Non-Hazardous Landfill**

The Management and Staff recognise that our activities at Għallis Non-Hazardous Landfill impact the environment. We are committed to continually improve our operations in order to protect the environment by minimising our environmental impact and enhance environmental performance. We aim to instil an awareness drive that seeks to promote environmental benefits within the Għallis Non-Hazardous Landfill at Magħtab Environmental Complex.

To meet this commitment, we will:

- Comply with IPPC permit IP 0001/06 and all applicable environmental laws and regulations that relate to our environmental aspects and impacts;
- Monitor and control the waste received on site, its handling, storage and disposal;
- Monitor and manage the activities associated with the generation of leachates;
- Implement emergency preparedness measures to minimise and control the risk of fire;
- Motivate and educate employees through training (formal and on-the-job).

To implement this policy we have adopted an Environment Management System.

The Management and Staff of the Għallis Non-Hazardous Landfill at the Magħtab Environmental Complex are aware of this policy and commit ourselves to adopt it. This policy is also communicated to the authority, the public including all visitors and contractors at the plant.

Mr Tonio Montebello  
Chief Executive Officer (CEO)
