Approved Documents: Document IP 0002/05/C

Location: HF-61, Hal Far Industrial Estate, Hal Far BBG 3000  
Proposal: Production of basic pharmaceutical products (Active Pharmaceutical Ingredients)

**Renewal and Variation Notice:**  
**Integrated Pollution Prevention and Control Regulations 2002 (LN 234 of 2002**  
**as amended by LN 230 of 2004 and LN 56 of 2008)**

The Malta Environment and Planning Authority (MEPA) hereby grants consent to renew and vary the IPPC permit in accordance with the attached IPPC permit document (IP 0002/05/C).

This permit regulates the management and operational conduct of the site.

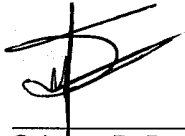

This permit is granted for a period of four years from its date of issue; however, it may be varied/surrendered/transferred as specified in pages 2 & 3 of the introductory note in the permit. An application for renewal of this permit is to be submitted at least six months prior to expiry of this permit.

This permit is granted subject to the following conditions:

1. Operations are to conform to the standards and operating conditions specified in the IPPC permit document (IP 0002/05/C) and associated approved documents as listed above.
2. Prior to issue of this permit, the applicant is to submit a financial guarantee of €14,900 to secure the obligations under this permit. This guarantee shall replace the financial guarantee requested under previous IPPC permits (IP 0002/05/A as varied by IP 0002/05/B) and be maintained by the permit holder throughout the term of validity of this permit. **The financial guarantee shall only be released on surrender of the permit.**
3. Prior to issue of the permit, the applicant is to make a contribution of €7,500 into the Environmental Fund of MEPA.
4. Additionally, a contribution of €1,150 is to be remitted by the permit holder to cover the first year of operations after this renewal. This consists of a fixed basic annual contribution of €750, with an addition of €400 reflecting the standard costs for MEPA for inspections for the first year of operations.

Future remittances will consist of the fixed annual amount of €750 and a variable addition reflecting MEPA's cost for inspections. The fixed annual amount of €750 will be increased to €1,500 should the installation cease to be in possession of environmental management certification recognised by the Malta Standards Authority. The latter variable component depends on the actual number of site inspections, which is determined by the performance of the operator. This total annual contribution has to be paid before the anniversary of the date of issue of this permit. Variations in MEPA's inspection expenditure will be reflected in the following year's contribution.

This permit is granted saving third party rights. The applicant/permit holder is not excused from obtaining any other permission, authorisation, etc., required by any other law.
