

WasteServ Malta Ltd

SAFETY PROCEDURES FOR
“VISIT BY JOURNALISTS TO TA’ ZWEJRA
FACILITY”

Visitors are to be received at the external part of the site by the official in charge of organising the visit on behalf of WasteServ. The official in charge is to ensure that all visitors are provided with the brochure on safety procedures to be followed and accompanied to the minibuses that will be used for transport within the site.

In this case personal protective equipment is not required but journalists should be accompanied by two officials from WasteServ (equipped with P.P.E). One should lead the group whilst the second should remain at the back. The accompanying persons should pay attention to movements of the visitors at all times.

Remember all the members of the group should remain together all the time and no one is allowed to distance himself/herself from the group.
