### **ADDITIONAL VARIATION**

Dear Sirs,

Reference is made to our letter of 22<sup>nd</sup> December 2011 outlining the proposed variations to the IPPC Conditions, your response of 11<sup>th</sup> January 2011 and our discussion of last Friday.

In view of this, we would like to here propose an additional variation for the IPPC permit for WOCL based on your response and our subsequent discussion.

The proposal is to omit completely the requirement of reporting for the fuel consumption of trucks, as this does not form part of the function of WOCL. WOCL plant functions are strictly immobile and the only fuel consumption involved, as highlighted in our original application, involves the boiler fuel.

Every means of transport is adequately and appropriately covered by its own legislation.

Thanks and Regards

**Ing Ruben Buhagiar**  
**Group Services Engineer,**
