Hi Victor,

hope this email finds you well.

I am enclosing an application sent by ERA regarding the Shredder which Gasparell has at Hal Far. Thanks to an emissions issue which cropped up during monitoring, we have to fill in this form, which is being attached. The main points which I need from your side are the rated thermal input and fuel used. I can fill up the rest. I am Also enclosing a copy of the engine plate, maybe it would save you having to make a site visit.
