<b>1</b>	<b>Details of GBR/Environmental Permit/IPPC/ Nature permit</b>	
Name of Applicant:	Godfrey Cutajar obo Gasparell Baling Plant Ltd	
Site address:	21, Brolli Street, Birzebbuga BBG 1847	
Proposed activities:	Processing and storage of ELVs; Processing of scrap metal; Storage of scrap metal; storage and dispensing of fuel as received from ELVs; use of shredder (as per current permit), wire stripping and compactor machine and scrap cable wire recycling crushing separating machine (as per pending variation application)	
<b>2</b>	<b>Details of changes in permitted operations, application details, equipment and processes (including any changes in materials and chemicals used). (if applicable)</b>	
Reference (Condition, schedule, table etc)	Brief description of changes	
	N/A	
Additional documentation: <i>(Applicant to attach any further documentation representing any proposed changes)</i>		

3 Status of improvement programme / pending submissions			
Ref.	Description	Status	Reason for lack of submission and proposed timeframes
12	Submission of an updated list of all equipment that will require maintenance (including but not limited to the sedimentation tank and fuel retention separator), a maintenance schedule for all such equipment detailing the nature and frequency of maintenance, and a template for keeping maintenance records.	<i>Submitted</i>	
13*	Certification from a competent company or engineer that the relevant fire safety procedures and equipment are in place, including emergency firefighting water supplies for use by the Civil Protection Department.	<i>submitted</i>	
14*	<p>In order for the facility to be 'notified' as per S.L. 545.22 Petroleum for the Inland (Retail) fuel market Regulations, the Operator should use:</p> <p>a) For petrol – a tank not exceeding 300 litres as approved by a competent person, as described within the same regulations</p> <p>b) For diesel – the current tank present on site may be used, provided it is approved by a competent person.</p> <p>The REWS approved competent person should present a technical report to REWS describing both tanks and how these fuels will be transferred safely to the company's shredder(s), excavators, shearers or any other non-mobile machinery without creating any impact on the environment.</p>	<i>Pending</i>	<i>Correspondence still ongoing with REWS; latest meeting held on 19/5/2022; Engineer still to make submissions</i>

15	Certification by an independent warranted civil engineer or engineer that the fuel retention separator has been constructed in accordance with EN 858, including inspection of the efficiency of operation covering the whole area of the extended site.	<i>submitted</i>	
16	Certification by an independent warranted civil engineer or engineer that the engineered site containment and drainage systems for the site extension are leak-proof and resistant to physical, mechanical and chemical stresses to which they may be subjected.	<i>Not submitted</i>	<i>Work on extension is still ongoing</i>
17	<p>Execution of the following actions following submission of noise monitoring report dated 16<sup>th</sup> November 2018 (App. Doc.: IP 0004/12/B/DOC3):</p> <p>(a) Submission of proposal for modelling and implementation of noise reduction measures (including timeframes) as per noise monitoring report conclusions dated 16<sup>th</sup> November 2018;</p> <p>(b) Implementation of noise reduction measures approved by the Authority;</p> <p>(c) Submission of a noise monitoring proposal for the approval of the Authority (to verify the effectiveness of the implemented noise mitigation measures);</p> <p>Noise monitoring exercise to be carried out following approval of "(c)" above</p>	<i>Submitted</i>	
18	Submission of a PM <sub>10</sub> and TSP monitoring report in accordance with the approved method statement.	<i>submitted</i>	
19	Submission of the plan for use of the shredder in line with condition 2.1.2.	<i>submitted</i>	

20	Submission of an SOP in relation to the use of the water dousing system during the operations of the shredder.	<i>submitted</i>
