

Certification of containment (e.g. settling pits, retention tanks, bunds) for impermeability

Standards used for testing:

1. Earth Retaining Structures: BS8002, or similar Concrete Retaining Structures: BS8007
2. Ground Investigation: BS5930, or similar.
3. Soil Testing: BS 1377 (Including permeability), or similar
4. Earthwork Specification: Specification for Highway Works, or similar.
5. Geotechnical Design: Various, Eurocode 7
