

## CLARIFICATION

### TO WHOM IT MAY CONCERN

This Environmental Impact Assessment Update has been prepared for the proposal subject of development permit application PA/05908/23 for the **Proposed conversion from a temporary to a permanent tuna farming area as established in PA 2175/18; retaining the approved total biomass of fish and all relative conditions**

Following the conclusion of the EIA update report, it was brought to our attention that the application description on the Planning Authority's eapps system had been changed to the following:

**Proposed conversion from a temporary to a permanent tuna farming area as established in PA 2175/18; to setup the North Aquaculture Zone (NAZ) intended exclusively for tuna farming**

Having confirmed that the change in the description does not imply any material change in the development and its operations and having received written confirmation from the Department of Fisheries and Aquaculture (the applicant) that the total biomass of fish and all relative conditions will be retained as approved in PA 2175/18, we hereby confirm that the contents of the EIA update report remain valid.
