

Environmental Permit

Environment Protection Act (CAP. 549)

Permit Number:

EP 00018/26

The Environment and Resources Authority (hereinafter the Authority; the Competent Authority or ERA) in exercise of its powers under the Environmental Protection Act (CAP. 549), hereby authorises:

BCRS Malta Limited (hereinafter “the Permit Holder”),
Company registration number: **C96013**

To operate a waste management facility at:

**BCRS Clearing Centre,
HHF 406 Hal Far Industrial Park,
Hal Far, Birżebbuġa,
Malta**

This permit is valid for **four (4) years** from the Permit granted date below and subject to the conditions overleaf. An application for the renewal of this permit is to be submitted at least six (6) months prior to the expiry of this permit.

Signed	Date
Perit Vincent Cassar Chairperson	Permit Granted: 22.09.2026

Authorized to sign on behalf of the Competent Authority

Preamble

The Permitted Installation shall, subject to the conditions of this Permit, be managed, controlled and operated as described in the application, or as otherwise previously agreed in writing by the Authority.

Conditions

1. Permitted Operations

- 1.1. The Permit Holder is authorized to carry out the operations and the associated operation specified in Table 1.1.

Table 1.1: List of permitted operations

Operation	Description of specified operation	Limits of specified operation
Category 1.10 of SL 549.172 Non-hazardous waste collection, treatment, disposal, temporary storage and, or preparation for reuse (including packaging, sorting and, or processing of waste prior to reuse or recovery), except waste generated on the same site.	<i>Acceptance, sorting and temporary storage of non-hazardous waste as per Schedule 1:</i> Receipt, baling, compacting, sorting and storage of wastes in designated areas.	From receipt of waste to inspection, separation and baling of material prior to dispatch to authorised facilities locally or abroad.

- 1.2. The operations authorised under condition 1.1 shall not extend beyond the site, as shown in Schedule 2 of this permit.

2. Improvement Programme

- 2.1. The Permit Holder shall complete the improvements specified in Table 2.1 by the date specified in that table and shall send communication of completion on ced.notifications.era@era.org.mt.

Table 2.1: Improvement programme

Reference	Requirement	Deadline
4.	Certification of implementation by an independent third-party engineer, of the Fire Safety Measures indicated in the document at Minute 40A.	As per timeframes in the document at Minute 40A.

3. Waste

3.1. Permitted Operation on Site

- 3.1.1. Only waste streams as set out in the European Waste Catalogue (EWC) code in Schedule 1 can be accepted and stored on site. The permitted waste shall only be accepted for sorting and processing prior to dispatch to authorised facilities locally or abroad.
- 3.1.2. The total quantities of waste accepted at the site per year shall not exceed any value the Site can handle during the year. The total amount of waste that can be stored at any given time cannot exceed the capacity of the permitted facility as indicated by the Permit Holder during the application process. A change in either operational or storage capacity would require a permit modification.
- 3.1.3. All wastes leaving the site after storage must only be sent to facilities licensed to accept the individual waste streams, either locally or abroad.
- 3.1.4. No storage of waste, equipment or materials is permitted on property outside the site premises as indicated in Figure 2.1 in Schedule 2.

3.2. Equipment

- 3.2.1. The Permit Holder shall maintain records of the weight of each waste consignment received and/or removed from the site, and such data is to be collected using properly calibrated equipment.
- 3.2.2. All plant, equipment and technical means shall be maintained in good operating condition and without causing polluting emissions, leaks and spillages. Maintenance records of the above shall be kept by the Permit Holder and must be made available to the Authority upon request.

3.3. General Waste Acceptance, Storage, and Handling

- 3.3.1. The Permit Holder shall apply the precautionary principle to safeguard the environment whilst carrying out the permitted operations and shall immediately refuse the entry of waste that is suspected to be in breach of the conditions of this permit.
- 3.3.2. The Permit Holder shall ensure that all waste management operations authorised in accordance with this Permit are carried out in an orderly manner and in such a way as not to cause adverse impact on the environment.
- 3.3.3. All wastes shall be stored within a designated and controlled storage area prior to removal from site to an authorised facility either locally or abroad. Any unpermitted wastes that may inadvertently enter the site must be stored in the quarantine area prior to removal from site.

- 3.3.4. All wastes leaving the site after storage must only be sent to permitted facilities authorised to accept the individual waste streams, either locally or abroad, in the case of local facilities, the Permit Holder shall only make use of disposal/recovery sites that are duly permitted by the Competent Authority, as set in the Subsidiary Legislation 549.63 – the Waste Regulations or by authorised waste management facilities abroad.
- 3.3.5. An audit trail is to be maintained for the waste received and sent for treatment, recovery or disposal to another facility locally or abroad, which audit trail shall cover all waste from the point of generation or collection to the end recovery facility abroad.
- 3.3.6. No storage of waste destined for disposal is permitted for a period exceeding twelve (12) months. No storage of waste destined for recovery or treatment is permitted for a period exceeding three (3) years.
- 3.3.7. The Permit Holder is to prevent litter or other wastes escaping from the site boundaries particularly during loading/unloading. Any such escape of waste shall be collected immediately upon detection.
- 3.3.8. The Permit Holder shall make use of the services of a registered waste carrier for the transport of waste from the site in accordance with activity 38 of Schedule 1 of the Subsidiary Legislation 549.45, the Waste Management (Activity Registration) Regulations. Where the company removes wastes using its own transport, the vehicle(s) must also be registered as a waste carrier in accordance with S.L. 549.45 or any statutory provisions or regulations amending or replacing them.
- 3.3.9. Should the Permit Holder require the services of a waste broker, it shall be ensured that any such broker is a duly registered waste broker in accordance with S.L. 549.45.
- 3.3.10. Transboundary movement of waste shall be carried out in accordance with the following regulations, as amended from time to time:
- a. Regulation (EU) 2024/1157 of the European Parliament and of the Council of 11 April 2024 on shipments of waste, amending Regulations (EU) No 1257/2013 and (EU) 2020/1056 and repealing Regulation (EC) No 1013/2006; and
 - b. Any other applicable legislation.
- 3.3.11. The Permit Holder shall ensure to provide:
- a. A receipt at the point of acceptance indicating the facility name, permit number, date, time and weight of the consignment, and should also bear a unique sequential number.
 - b. A declaration for all the consignments of waste accepted and removed on Site shall also be issued indicating the facility name, permit number, type, weight and final destination of the waste removed, also bearing a unique sequential number.

- c. In case of packaging waste, as per obligations of S.L. 549.43, the declaration shall also be accompanied with recovery/disposal certificates provided by the Authority, examples of which are as specified herein <https://era.org.mt/era-topic-categories/reporting-obligations/>. Copies of these are to be provided to the person/company handing over the waste to be recycled on a quarterly basis (i.e. one certificate covering January to March, April to June, July to September, and October to December respectively).

In cases of non-waste carriers or domestic sources, a receipt would suffice.

- 3.3.12. Disposal and/or recovery certificate and any documentation related to transfer of waste to and from the site and/or related to its end disposal and/or recovery shall be kept on record and made available for inspection for a period of at least five (5) years from date of their issue.
- 3.3.13. Movement of waste outside of the permitted site for the purpose of loading shall not commence prior to the arrival of the truck/container on site.
- 3.3.14. The Authority may stop any consignment/s of waste in transit from the site should the Authority require any checks and/or investigation on such a consignment/s.
- 3.3.15. The Permit Holder shall ensure that no chemicals or waste escape to the environment especially when transporting such materials offsite or onsite.

4. Operating Conditions

4.1. Emission to Air

- 4.1.1. All processes which generate significant levels of airborne contaminants (such as dusts, gases, odorous chemicals) shall have effective local collection and shall discharge (after treatment where necessary) through a stack or vent located and/or designed in such a way as to avoid local effect.
- 4.1.2. ERA recommends that any diesel (oil gas) used shall have a sulphur content of not greater than 0.1%.
- 4.1.3. The co-incineration of any material or additional fuel including engine or other waste oil is strictly prohibited. Any changes in fuel type shall require the notification and approval of the Authority prior to commencement of its utilization.
- 4.1.4. Should the Permit Holder intend to install equipment which falls within the Medium Combustion Plants Regulations, S.L.549.122 (e.g. generator, boiler, etc.), a modification of this Permit must be secured prior to installation and operation of this equipment.
- 4.1.5. In the event of malfunction or breakdown leading to abnormal emissions from equipment, the Permit Holder must:

- a. Investigate immediately and undertake corrective action, and
- b. Adjust the process or activity to minimize those emissions, and
- c. Record the events and actions taken.

In the event of non-compliance causing immediate danger to the environment, operation of the operation must be suspended and the Competent Authority informed within 24 hours.

- 4.1.6. Further to condition 4.1.5, the Permit Holder shall provide ERA with details of the specific cause of the malfunction and the remedial steps taken or to be taken to address the malfunction.
- 4.1.7. All abatement equipment and ducting shall be cleaned and maintained on a regular basis, as per manufacturer specifications. Records of such maintenance shall be kept in accordance with Condition 6.4 (Site Records).
- 4.1.8. The Permit Holder shall prevent or where that is not practicable, minimise fugitive emissions of substances to air from the Permitted Installation. Particular areas of the operation which may generate dust shall be regularly wetted down to mitigate dust emissions onto the surroundings.

4.2. Effluent Discharges and Emissions to Land

- 4.2.1. No discharge and/or emissions of pollutants to surface water, groundwater and/or land shall take place from the Permitted Installation.
- 4.2.2. Foul sewer drains must be strictly segregated from storm water drains.
- 4.2.3. Process effluents shall not be diluted prior off-site transfer.

5. Site Infrastructure and Operations

- 5.1.1. During non-operating hours the site shall be firmly closed and totally inaccessible to third parties, both by vehicle and on foot. The site must be well secured at all times.
- 5.1.2. A clearly marked quarantine area shall be kept within the site boundary for the temporary storage of unpermitted waste, in a sealed, leak-proof skip or equivalent containment. Stored quantities shall not exceed the areas' designed capacities.
- 5.1.3. The Permit Holder is to ensure that the waste is organised into the designated areas, labelled and with visible physical delineation of these areas in place.
- 5.1.4. No waste shall be deposited, stored, treated or otherwise handled in any area of the site that is not impermeable. No liquid wastes are allowed to be kept on site.

6. Site Management

6.1. Staff Obligations and Responsibilities

- 6.1.1. All employees authorised by the Permit Holder to undertake waste management operations on their behalf, shall be fully conversant with the obligations of this permit and shall be individually aware of their responsibilities and liabilities in observing the conditions of this permit. They shall be provided with adequate professional technical development and training and written operating instructions to enable them to effectively carry out duties.
- 6.1.2. One member of the staff be nominated as the Technically Competent Person (TCP) of the site, whereby this person is to physically represent the Permit Holder during the times when the Permit Holder will not be available.
- 6.1.3. Where the Permit Holder is also the designated TCP for the facility, a delegate TCP should also be appointed to represent the Permit Holder/TCP during the times when the Permit Holder/TCP will not be available.
- 6.1.4. The TCP is responsible for the implementation of all the obligations stipulated in this permit, must supervise the rest of the staff on site and is completely responsible to ascertain that all permit conditions are being adhered to.
- 6.1.5. In the event of leave of absence taken by the TCP and delegate conjointly for a period exceeding 10 days or change in the TCP, the Permit Holder is obliged to find a replacement for that member of staff without delay and the Authority informed accordingly.
- 6.1.6. All the staff on site shall be fully aware of the procedures to be taken to contain any environmental hazard which may arise related to the operations being carried out on site.

6.2. Accident Prevention and Control

- 6.2.1. The Emergency Response Plan (including a fire plan) shall be maintained and adhered to. The ERP shall contain details of the location, nature and quantity of chemicals, oils and fuels stored, any special hazards, a drawing showing location of drains and the emergency phone numbers of the Permit Holder and relevant authorities. It shall also include actions to be taken in the case of incidents which could affect the environment, such as fires and chemical/fuel spills. The emergency plan shall indicate that accidental releases of chemicals and fires caused by chemicals are to be managed as specified in the respective Safety Data Sheets (SDS).
- 6.2.2. In the case of an accident (including fires, chemical spills, etc.), the Permit Holder shall follow the Emergency Response Plan referred to in Condition 6.2.1 and shall notify the Authority within immediately.
- 6.2.3. In the event of accidents that may lead to contamination of the surrounding environment, the Permit Holder shall notify the Authority within 24 hours and take immediate action as may be directed by the Authority. The Authority reserves the right to

request any studies, measures, or actions it deems necessary, including but not limited to investigations, risk assessments, remedial works, and preventive measures to ensure the protection of the environment.

- 6.2.4. The Permit Holder shall undertake all necessary measures and precautions to prevent spillage of raw materials, intermediates, products, waste and any other materials.
- 6.2.5. Spillages of fuels, chemicals or other hazardous material shall receive immediate attention to prevent escape to drain, surface water or land. Spilled material shall be disposed of in an appropriate manner. Kits for the collection of liquid and powder spills shall be available on site at strategic locations.
- 6.2.6. Small leaks or spills shall be cleared up immediately by the application of absorbent materials. All used absorbent materials shall be disposed of as hazardous waste at facilities permitted to accept such waste.
- 6.2.7. The Permit Holder shall have in storage an adequate supply of suitable absorbent material to absorb any spillage.

6.3. Closure and Decommissioning

- 6.3.1. The Permit Holder shall notify the Authority prior to ceasing operations permanently in part or full, whereby an application for cessation of operations shall be made to the Authority and shall include a decommissioning plan.
- 6.3.2. In the event of cessation of operations on the site, the Permit Holder shall remain responsible for all wastes and hazardous materials on site, which shall be removed from the site in accordance to good environmental practice and in such a manner that minimises environmental risks.
- 6.3.3. The Decommissioning Plan shall be implemented one approved by the Authority and within twelve (12) months of final cessation of operations or as agreed with the Authority in writing.
- 6.3.4. All obligations of this permit shall subsist until such time that the Authority notifies the Permit Holder in writing that all obligations and conditions of the permit have been fulfilled without prejudice to any liabilities and third-party rights.
- 6.3.5. When deemed necessary, the Authority may require the Permit Holder to take such additional measures as it considers necessary with respect to after care obligations in relation, but not limited to the remedial action, rehabilitation, and monitoring of the waste management or waste production site.
- 6.3.6. In the event of cessation of operations of any plant and equipment specified in this permit and/or which is integral to the carrying out of the permitted operations, the Permit Holder shall notify the Authority about the type of equipment, its intended fate a details of the transferee.

Unless the plant/equipment shall be transferred off-site in its current state, the Permit Holder shall submit a plan to the Compliance and Enforcement Unit which shall include the following details:

- a. The appointed contractor or other competent person who shall carry out any works (e.g. cleaning, dismantling etc.).
- b. A complete inventory of all the materials that shall be dismantled/removed, including waste streams classified according to their respective EWC code as per S.L. 549.63 and details on the manner in which waste will be managed. Waste resulting from depollution shall also be included.
- c. The proposed cleaning, dismantling and transport procedures.
- d. Precautions and mitigation measures during such works to prevent spillages and other potential emissions to the environment.
- e. Timeframes associated with the implementation of this plan.

Upon completion of the decommissioning operations as outlined in the approved plan, a decommissioning report shall be submitted. The report shall state the works executed and any deviations from the plan.

For any plant/equipment and/or parts thereof, which shall not be considered as waste in accordance with S.L. 549.63, The Waste Regulations, a certificate of good working order from an independent warranted engineer shall be submitted to the Compliance and Enforcement Unit following any works that may be necessary at the permitted installation.

6.4. Site Records

6.4.1. A site daily operations log shall be made in a legible manner and kept on site and be made available for inspection by the Authority at any reasonable time. The following information shall be recorded on a daily basis and retained for five (5) years:

- a. Total amount of waste in tonnes accepted on site;
- b. Total amount of waste in tonnes removed from site for disposal or further treatment;
- c. Total amount of waste in tonnes refused entry on site;
- d. Total amount in tonnes of unaccepted material sent to the quarantine area and by which registered waste carrier it was transported;
- e. Any incidents that took place on site such as mechanical faults in the machinery or equipment used on site, any spills, fires, etc and the remedial action taken;
- f. Any other incidents that the Permit Holder deems important to record in the Site daily operations log; and
- g. Any Complaints related to the operations at the site.

Each record shall be compiled within 24 hrs of the relevant event. The records kept in the site operations log shall be made available for inspection to the Authority upon request.

- 6.4.2. The Permit Holder shall maintain a record of the skills and training requirements for all staff whose tasks in relation to the Permitted Installation may have an impact on the environment and shall keep records of all relevant training.
- 6.4.3. The Permit Holder may wish to establish an Environmental Management System (EMS) to facilitate compliance with permit conditions and to assist in formalising procedures required by this permit. An EMS can take the form of a standardised system (e.g. EN ISO 14001:2015 or EMAS) or a non-standardised (“customised”) system, provided that it is properly designed and implemented. Guidance for a non-standardised (“customised”) system is provided as specified herein <https://era.org.mt/era-topic-categories/terms-of-reference-permitting/>.

6.5. Submissions

- 6.5.1. The Permit Holder shall submit to the Authority Waste Records and the Annual Environmental Report (AER) and of the previous year by not later than the 31st of March of each year, providing the information listed as specified therein <https://era.org.mt/era-topic-categories/reporting-obligations/>. It shall also be ensured that all reporting, certification and documentation as per Schedule 3 are submitted in accordance with their relevant timeframes to the Authority addressed to the Compliance and Enforcement Unit, Environment and Resources Authority.
- 6.5.2. An independent auditor shall be engaged by the Permit Holder to certify all of the waste reporting required by this permit, in line with the *Audit Procedures – Terms of Reference* as specified herein <https://era.org.mt/era-topic-categories/reporting-obligations/>. The results of such audit are to be submitted to the Authority in the form of a report, as part of the AER or by the 31st of March of each reporting year. The Authority may carry out any such audits on the installation itself as deemed necessary at the expense of the Permit Holder in line with condition 7.10.
- 6.5.3. Digital copies of the Waste Packaging Certificates as per condition 3.3.11 (c) shall be submitted on an annual basis as part of the Annual Environment Report. Hard copies of the Recovery/Disposal Certificates are also to be sent to the Authority every quarter accordingly.
- 6.5.4. Copies of the disposal and/or recovery certificates as per condition 3.3.12 shall be submitted on an annual basis as part of the AER.
- 6.5.5. All reports and submissions required by this Permit shall be made and sent to the Authority addressed to the Compliance and Enforcement Unit on ceu.notifications.era@era.org.mt.
- 6.5.6. The weighing equipment shall be maintained, calibrated and certified by an independent warranted engineer or by the equipment’s manufacturing company. This certificate is to be submitted to the Authority on an annual basis as part of Schedule 3.

- 6.5.7. The Permit Holder shall provide a reply to any clarifications which the Authority may have about any documentation or submissions made within the timeframe stipulated by the Authority.
- 6.5.8. In the event where operations cease temporarily (two (2) weeks or more), the TCP or Permit Holder are obliged to notify the Authority within two (2) days and are also to inform the Authority with regards to when the works are intended to resume.

7. General Conditions

- 7.1. This permit is granted saving third party rights and without prejudice to any other legislation or regulations or authorisations required from any other competent authorities or site owners.
- 7.2. The Permit Holder shall maintain a register of third-party complaints. The register shall record the details of complainant(s) if available, the date, source and nature of the complaint and the corrective action undertaken, where such action proves necessary.
- 7.3. The Permitted Installation shall be managed, controlled, supervised and operated by staff who are aware of the importance of environmental protection and suitably trained on the requirements of this Permit, Subcontractors who enter the site shall also be made aware of any obligations arising from the permit which might affect their duties.
- 7.4. Upon the joint application of a Permit Holder and a proposed transferee, the Permit Holder may request to transfer an environment permit. The Permit shall not be transferred from the Permit Holder without prior approval from the Authority. Upon the Authority's decision to transfer the Permit to the transferee, all rights, obligations, liabilities shall subsist onto the transferee.
- 7.5. The Permit Holder may apply for a modification in permit and shall seek the Authority's written agreement prior to any operational changes, by sending to the Authority:
 - a. Written notice of the details of the proposed change, including an assessment of its possible effects (including changes in emissions and waste production) on risks to the environment from the Permitted installation;
 - b. Any relevant supporting information (e.g. chemical/fuel consumption, technical details, changes in the type/use of substances/mixtures, etc.);
 - c. Any relevant supporting assessments and drawings, and;
 - d. The proposed implementation date.

Any such change shall only be implemented following the issue of a modification of the permit by the Authority.

- 7.6. Permit Holder shall notify the following matters to the Authority in writing at least 10 working days prior to their occurrence:

- a. Any change in the Permit Holder's trading name, registered name or registered office address;
 - b. Any change to particulars of the Permit Holder's corporate identity.
- 7.7. The Permit Holder shall notify the Authority, without undue delay, of any unplanned changes.
- 7.8. The Authority may amend any of the conditions of this Permit.
- 7.9. The Authority may carry out regular pre-set or unannounced compliance or monitoring checks that vary in frequency according to the site's compliance with the Permit conditions and safeguarding of natural assets. Any checks or audits carried out by the Authority may be made at the Permit Holder's financial expense at the rate and arrangement communicated by ERA.
- 7.10. The Authority's representatives may inspect and photograph any part of the site and ask for any closed or locked areas to be opened and may demand to be provided with any proof, documentation, plans, receipts or any other records.
- 7.11. This permit is granted against a bank guarantee of **€7,000** which shall be renewed annually. This guarantee will have to be maintained throughout the validity of the permit. Following renewal and/or variations/modifications to this permit, the Authority may require amendments to the Bank Guarantee.
- 7.12. The Authority may withdraw funds from the bank guarantee for any breach of permit conditions, instructions, or legal obligations under the Act or its subsidiary legislation. This does not preclude further enforcement action by ERA. If funds are withdrawn, the Permit Holder shall replenish the guarantee within two (2) months. Release of the Bank Guarantee is subject to the Authority's confirmation of full compliance.
- 7.13. In cases where the bank guarantee does not cover the expenses incurred by the Authority to take any remedial action on the Permit Holder's behalf, the Permit Holder is to financially reimburse the Authority for all the expenses incurred.
- 7.14. A copy of this Permit shall be available at all times at the permitted facility, including any Variation/Modification Notices or amendments to it.
- 7.15. The Authority may suspend or revoke this environmental Permit in line with the provisions of CAP.549.
- 7.16. The Authority may request monitoring, installation of additional abatement equipment and/or review of operational practices and commission any audits/reports as deemed necessary to address any circumstances that may affect the quality of the surrounding environment, at the expense of the Permit Holder.
- 7.17. Without prejudice to condition 7.16, the Authority may take any action deemed necessary including but not limited to the suspension of any operation until investigations are concluded.

Schedule 3

Annual Environment Report and Submissions

Important note

By this submission, you confirm that you give your explicit consent for the entire contents of this Annual Environment Report to be made available on the Authority's public website.

S3.1 Introduction

Environmental Permit Number	
Reporting Year (Calendar Year: 1 January to 31 December)	
Name and locality of Site	
Brief description of operations at the site	

S3.2.1 Waste Records

As per condition 6.5.1 the Permit Holder shall submit to the Authority information on waste records of the previous year by not later than end of March of each year, providing the information listed in the ERA website and in the format specified therein (<https://era.org.mt/era-topic-categories/reporting-obligations>).

S3.2.2 Fuel Consumption Data

Equipment ¹	Fuel type	Fuel Consumption	Units	Operating Hours
			Litres	
			Litres	
			Litres	
			Litres	

S3.3 Incidents and Complaints

S3.3.1 Non-Compliance Incidents during Reporting Year

Date of incident	Brief description of Incident	Cause	Corrective action

¹ E.g. Boiler, generator, vehicles, etc.

Total number of non-compliance incidents for the previous reporting period:	
Total number of non-compliance incidents for the current reporting period:	

S3.3.2 Complaints made by the public or through Authority

Date of complaint	Description of complaint	Actions taken

Total number of complaints for previous reporting year:	
Total number of complaints for current reporting period:	

S3.4 Submission of Certifications

Submission of waste records and AER every year as per Condition 6.5.1.	☐
Submission of Independent Audit Report every year as per Condition 6.5.2.	☐
Submission of weighing equipment calibration certificate every year thereafter as per condition 6.5.6.	☐

Permit Holder's declaration

I declare that, to the best of my knowledge, all the above information is correct and substantiated.
