

Aquatic Ecotoxicology Services

Brief description of services:

1. Alga and Cyanobacteria, Growth Inhibition Test (OECD TG 201) with marine and freshwater species:
 - a. *Desmodesmus subspicatus*
 - b. *Navicula pelliculosa*
 - c. *Raphidocelis subcapitata*
 - d. *Skeletonema sp.*
 - e. *Phaeodactylum tricornutum*
 - f. *Tetraselmis chui*
2. Acute toxicity tests with marine and freshwater invertebrates (OECD TG 202):
 - a. *Daphnia magna*
 - b. *Americamysis bahia*
 - c. *Brachionus plicatilis*
3. Acute toxicity tests with juvenile fish (OECD TG 203) with marine and freshwater species:
 - a. *Oncorhynchus mykiss* (rainbow trout)
 - b. *Danio rerio* (zebrafish)
 - c. *Dicentrarchus labrax* (European sea bass)
 - d. *Sparus aurata* (Gilthead sea bream)
