

## **Marine environmental monitoring**

### *Brief description of services:*

1. Marine surveying: bathymetric surveys, benthic habitat surveys using: ROV, sidescan sonar, multibeam SWATH, subbottom profiler, magnetometer, current profiling
2. Scientific SCUBA diving
3. Marine Sampling: sea water (ISO 5667), subsea sediment, microplastics, infauna, stable isotope
4. GIS mapping projects and remote sensing applications (drone and satellite)
5. Desktop research projects, impact and risk assessments
6. Training courses
