PA/04242/08	This application has been approved by Planning Board / Commission.	Quarry No. 71, Proposed Restoration Triq Ghal Ghar of Quarry in phases Hanzir, l/o Siggiewi including extension of same quarry.	Mr. Anton Camilleri
-------------	--	---	---------------------

Dear Sirs,

Subject: EP 0017/11 (SM71)

Dust mitigation measures that shall be taken/ are implemented on site including timeframes when these will be implemented if such measures are not yet on site.

Any mitigation measures that will be taken in order to limit dust emissions from the crusher. **The crusher is located very very deep in the quarry level close to the end point. Water spraying is carried out by bowser when necessary in the summer months. Average three times weekly.**

Any mitigation measures that will be taken in order to limit dust emissions while excavating for minerals. **The quarrying levels are very very deep at this stage in relation to the road level. Any dust settles before reaching the road levels and re-settles in the large quarry area.**

Any mitigation measures that will be taken in order to limit dust emissions from aggregate stockpiles. **The stockpiles are located very very deep in the quarry level close to the end point. Water spraying is carried out by bowser when necessary in the winter summer months. Average three times weekly.**

Any wheel washing facilities present on site. **Truck wheels washed with power washer before exit.**

Kind regards

Colin Zammit
