Subject: SEA Environmental Report of the European Territorial Cooperation Programme INTERREG VI-A Italia-Malta 2021-2027

ERA welcomes the opportunity to comment on the SEA Environmental Report of the Interreg VI-A Italia-Malta Programme 2021-2027, which the Authority received by email on 12th July 2022.

The Interreg VI-A Italia-Malta Programme proposes various objectives and actions which are intended to contribute to an integrated and harmonious sustainable growth and development of the respective territories, through cross-border cooperation.

ERA has reviewed the information provided. At this stage, given the general nature of the proposals, ERA does not consider that the programme is likely to result in major environmental impacts. The latter will depend on the details of subsequent plans and projects emerging from this programme, which would require separate environmental screening and transboundary consultations as relevant.

Yours sincerely,

Mr. Kevin Mercieca
Acting Chief Executive Officer
Environment and Resources Authority
